

StatLine

New interface

StatLine is completely renewed

The online databank of Statistics Netherlands has a new look, offers lots of graphics capabilities and works differently. This has made StatLine more user-friendly and accessible.

Operation

The new interface is suitable for PC, tablet and smartphone. You can adjust tables by dragging variables and changing your selections. At the push of a button you can simply switch from a table to a graph. Tables and graphs are easily downloaded, so you can distribute them further.

Most important changes

- Fit for all screen formats and devices
- Renewed and modern design
- Navigation more user-friendly
- More options for graphics
- Another format for links to tables

Transition

The new StatLine works in a very different manner from the old one. Consult the page 'help' for demo movies and user manual. In order to allow people time to adapt, the old and the new StatLine will be available side by side for a period of six months. The old interface will disappear after that.
