Enquête Beroepsbevolking (EBB) 2024

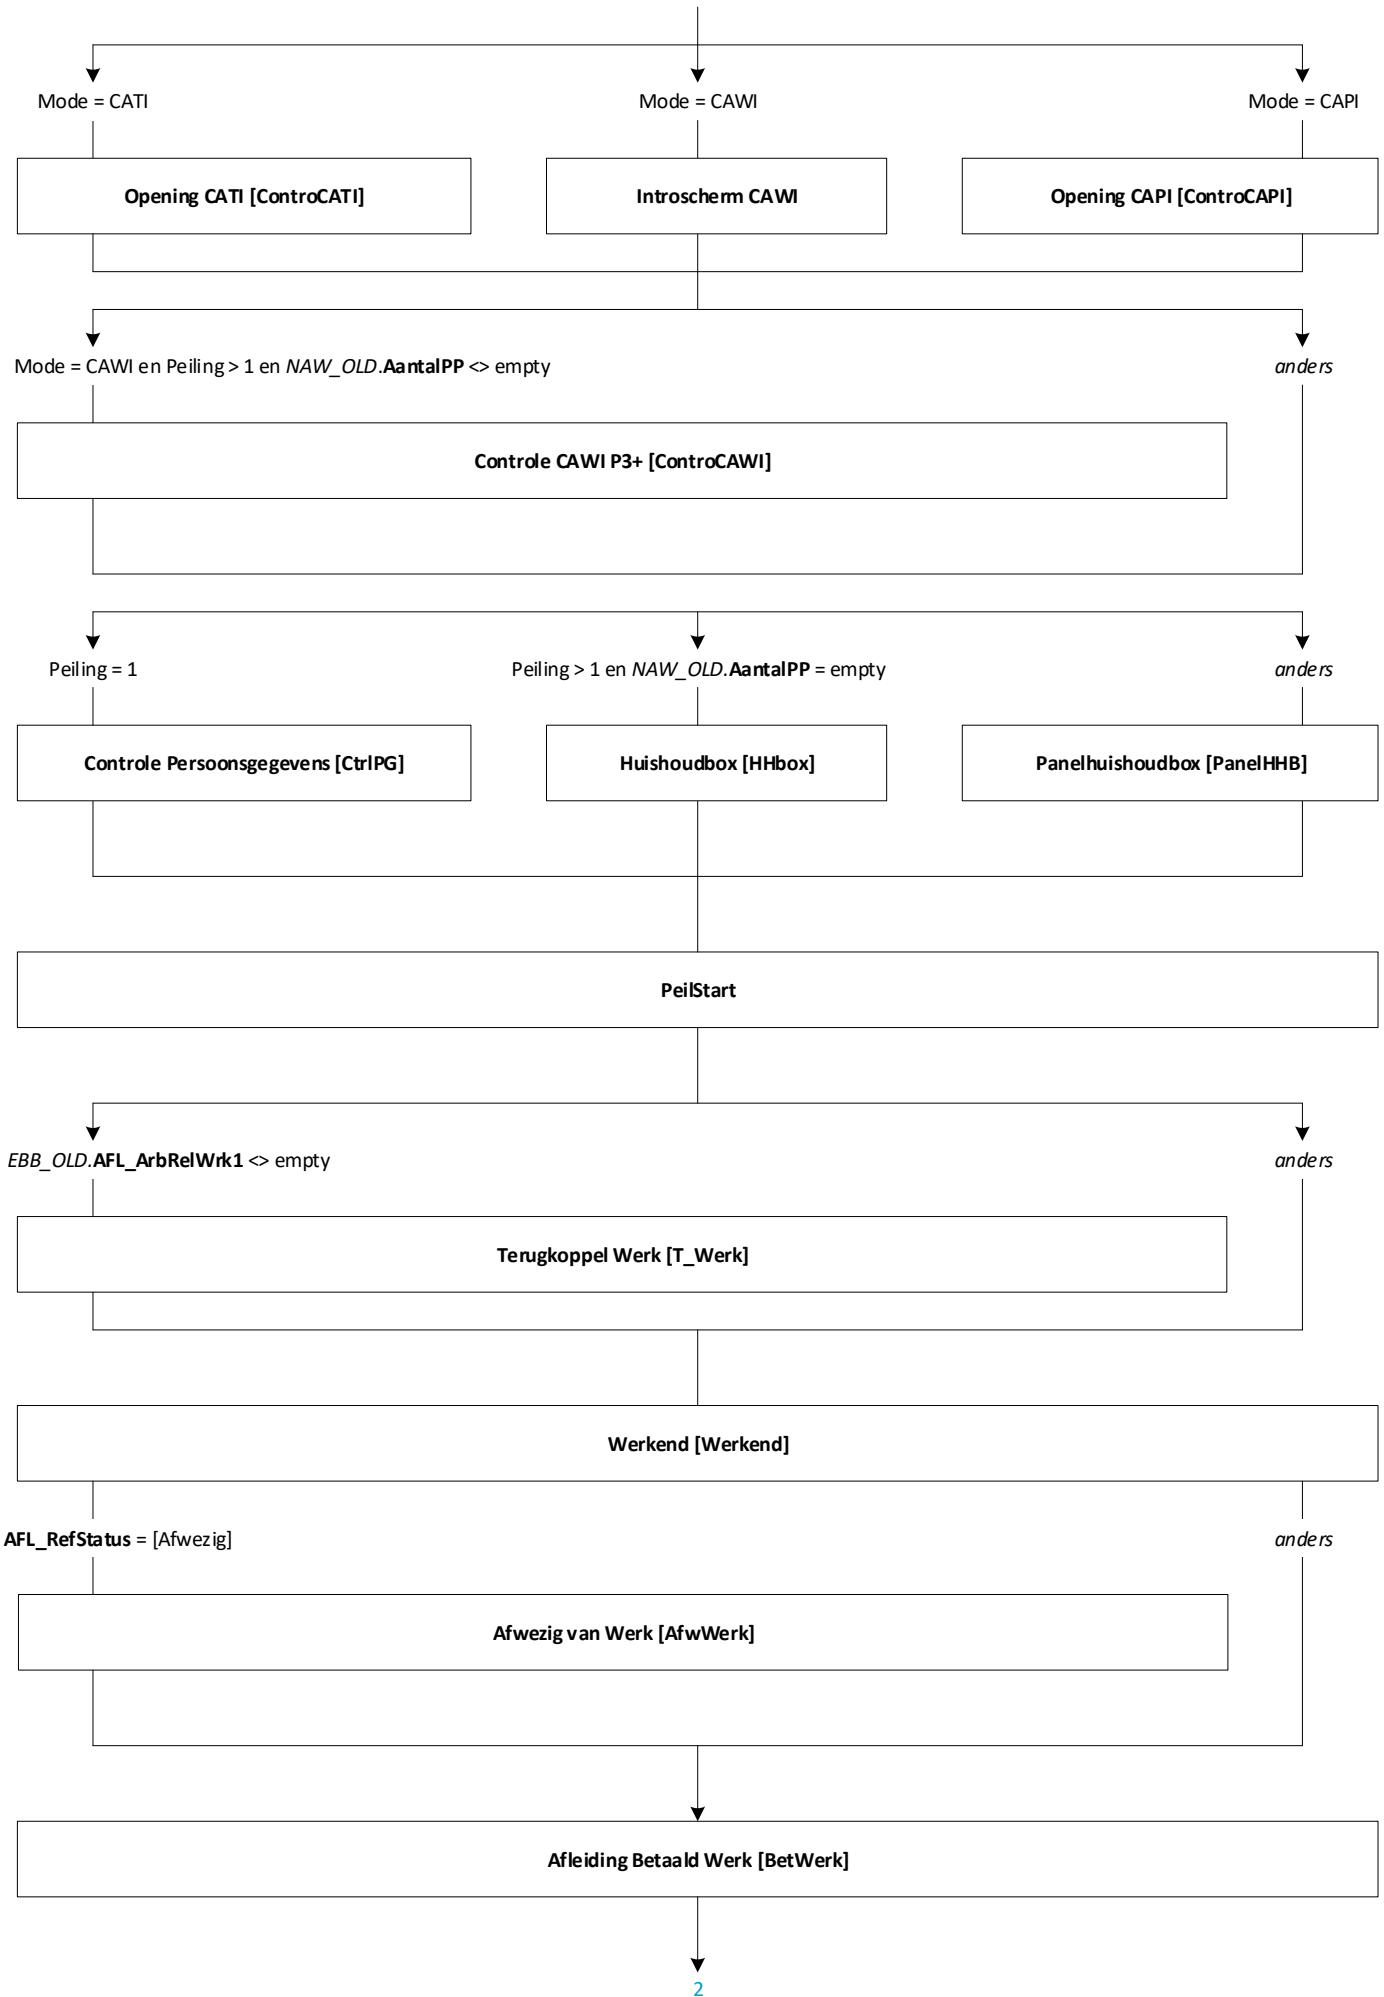

M. Cremers

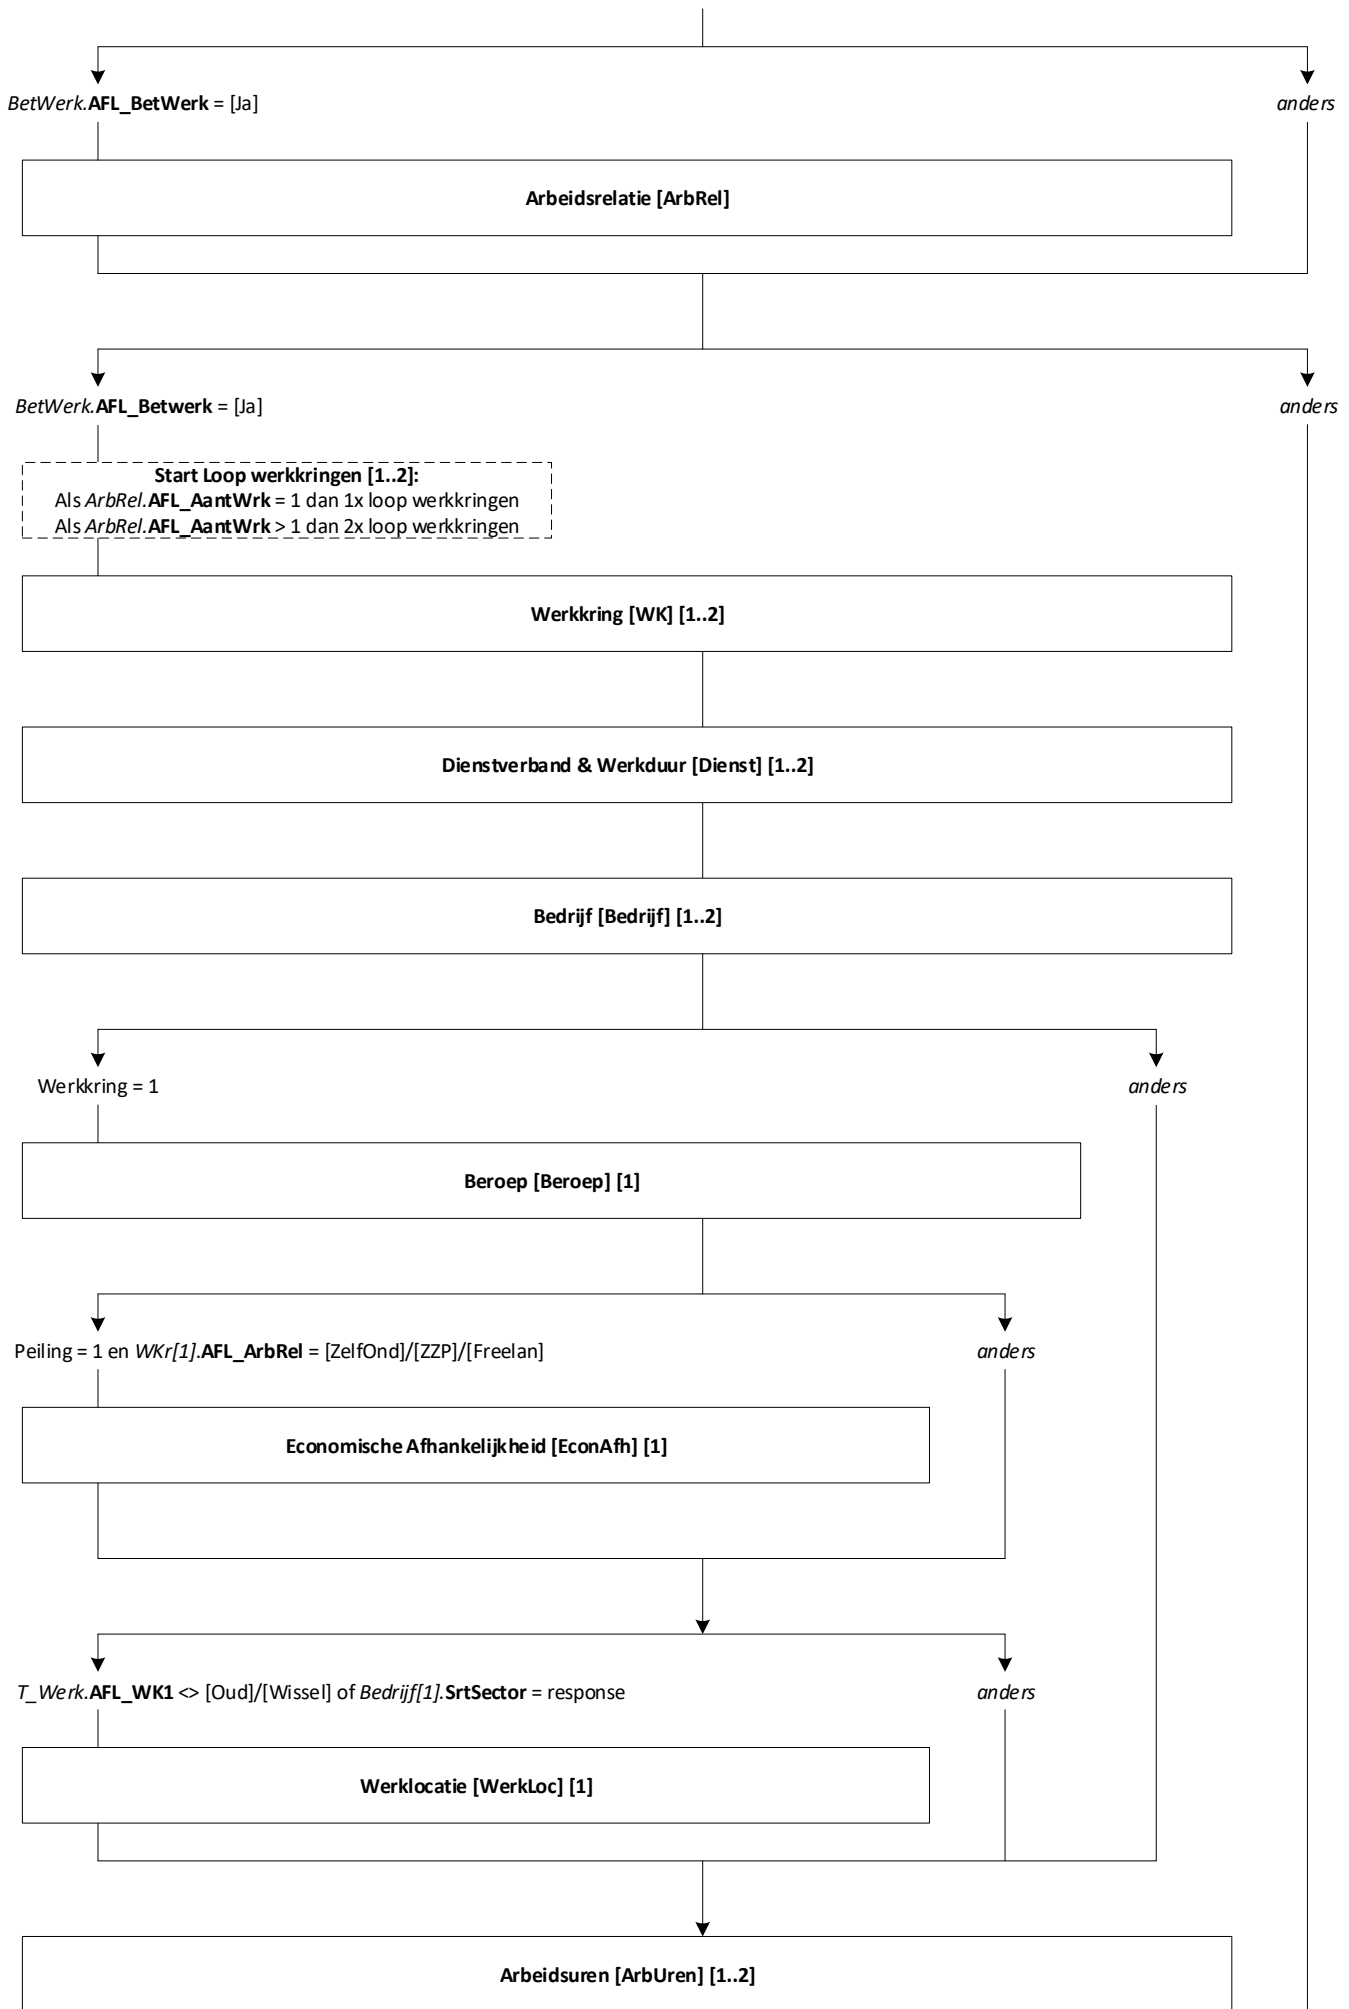

Versie: 1.4

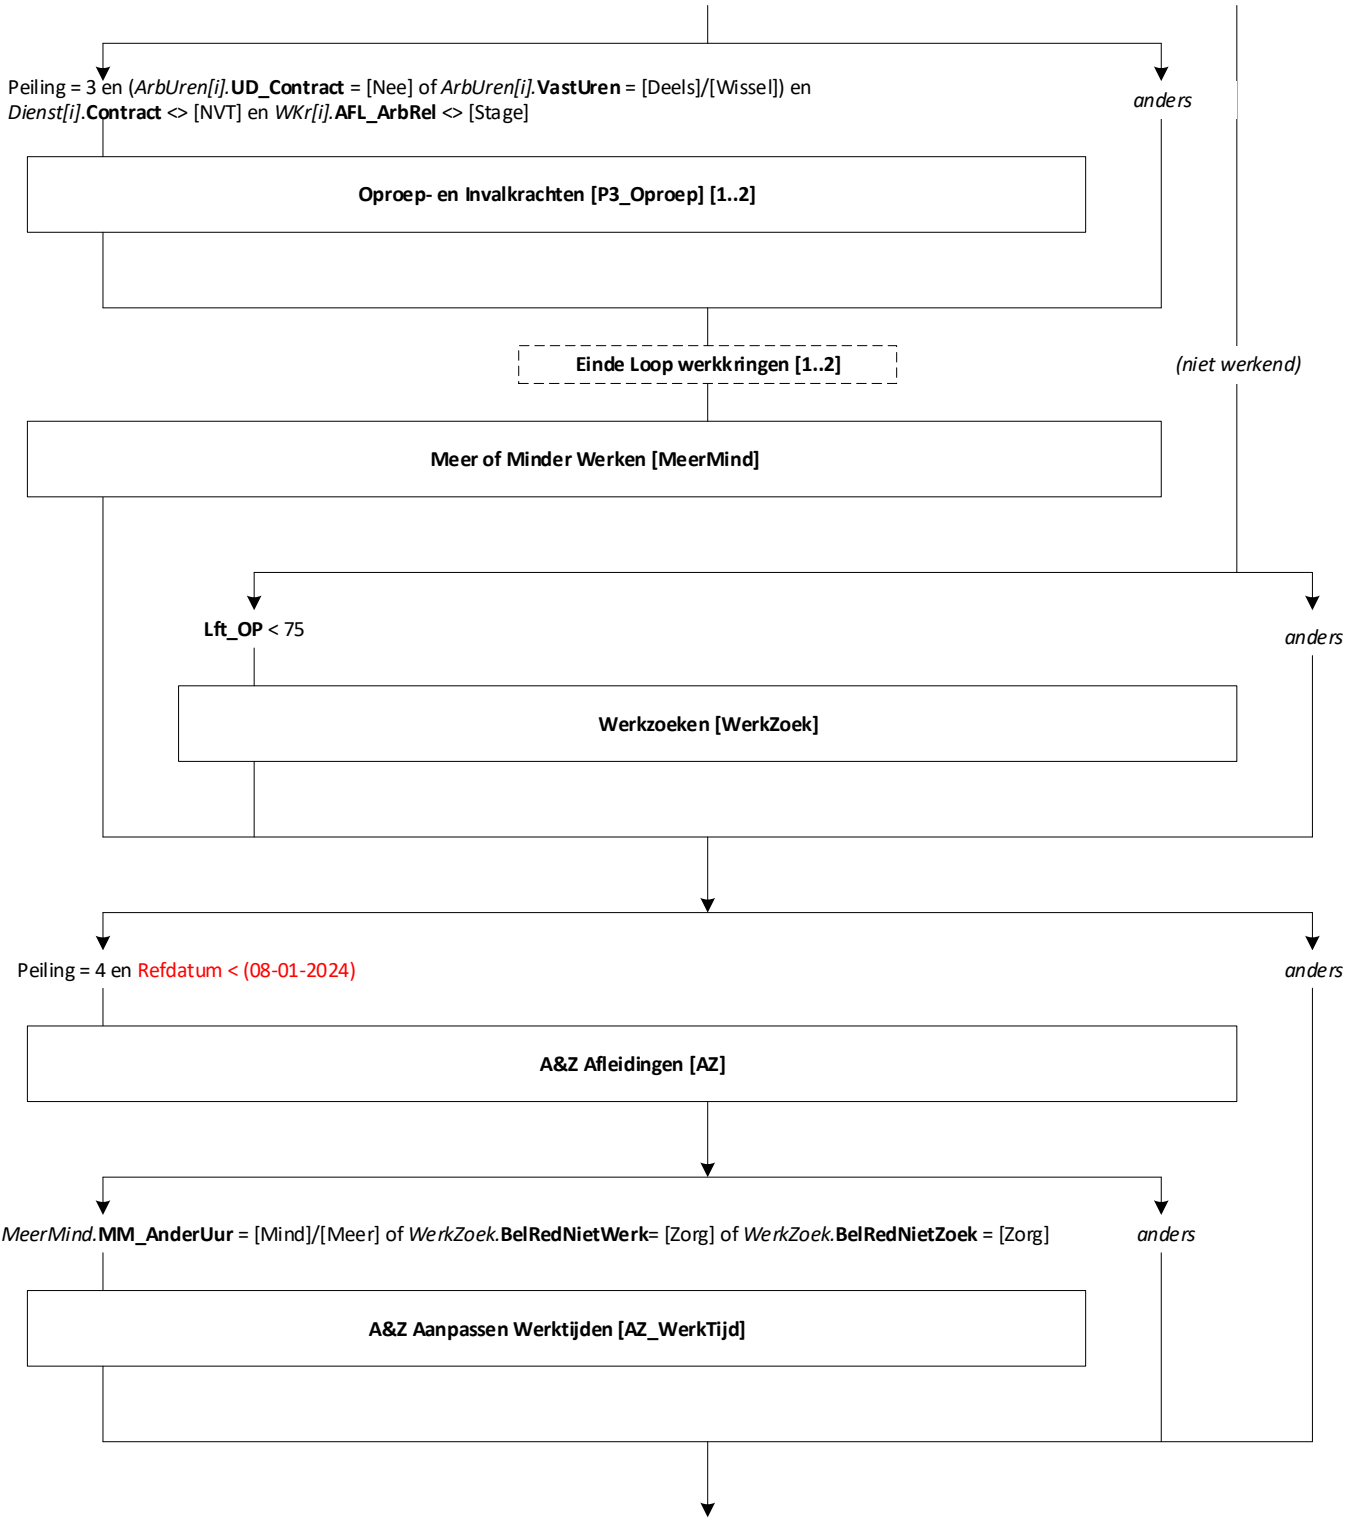

Datum: 04-10-2023

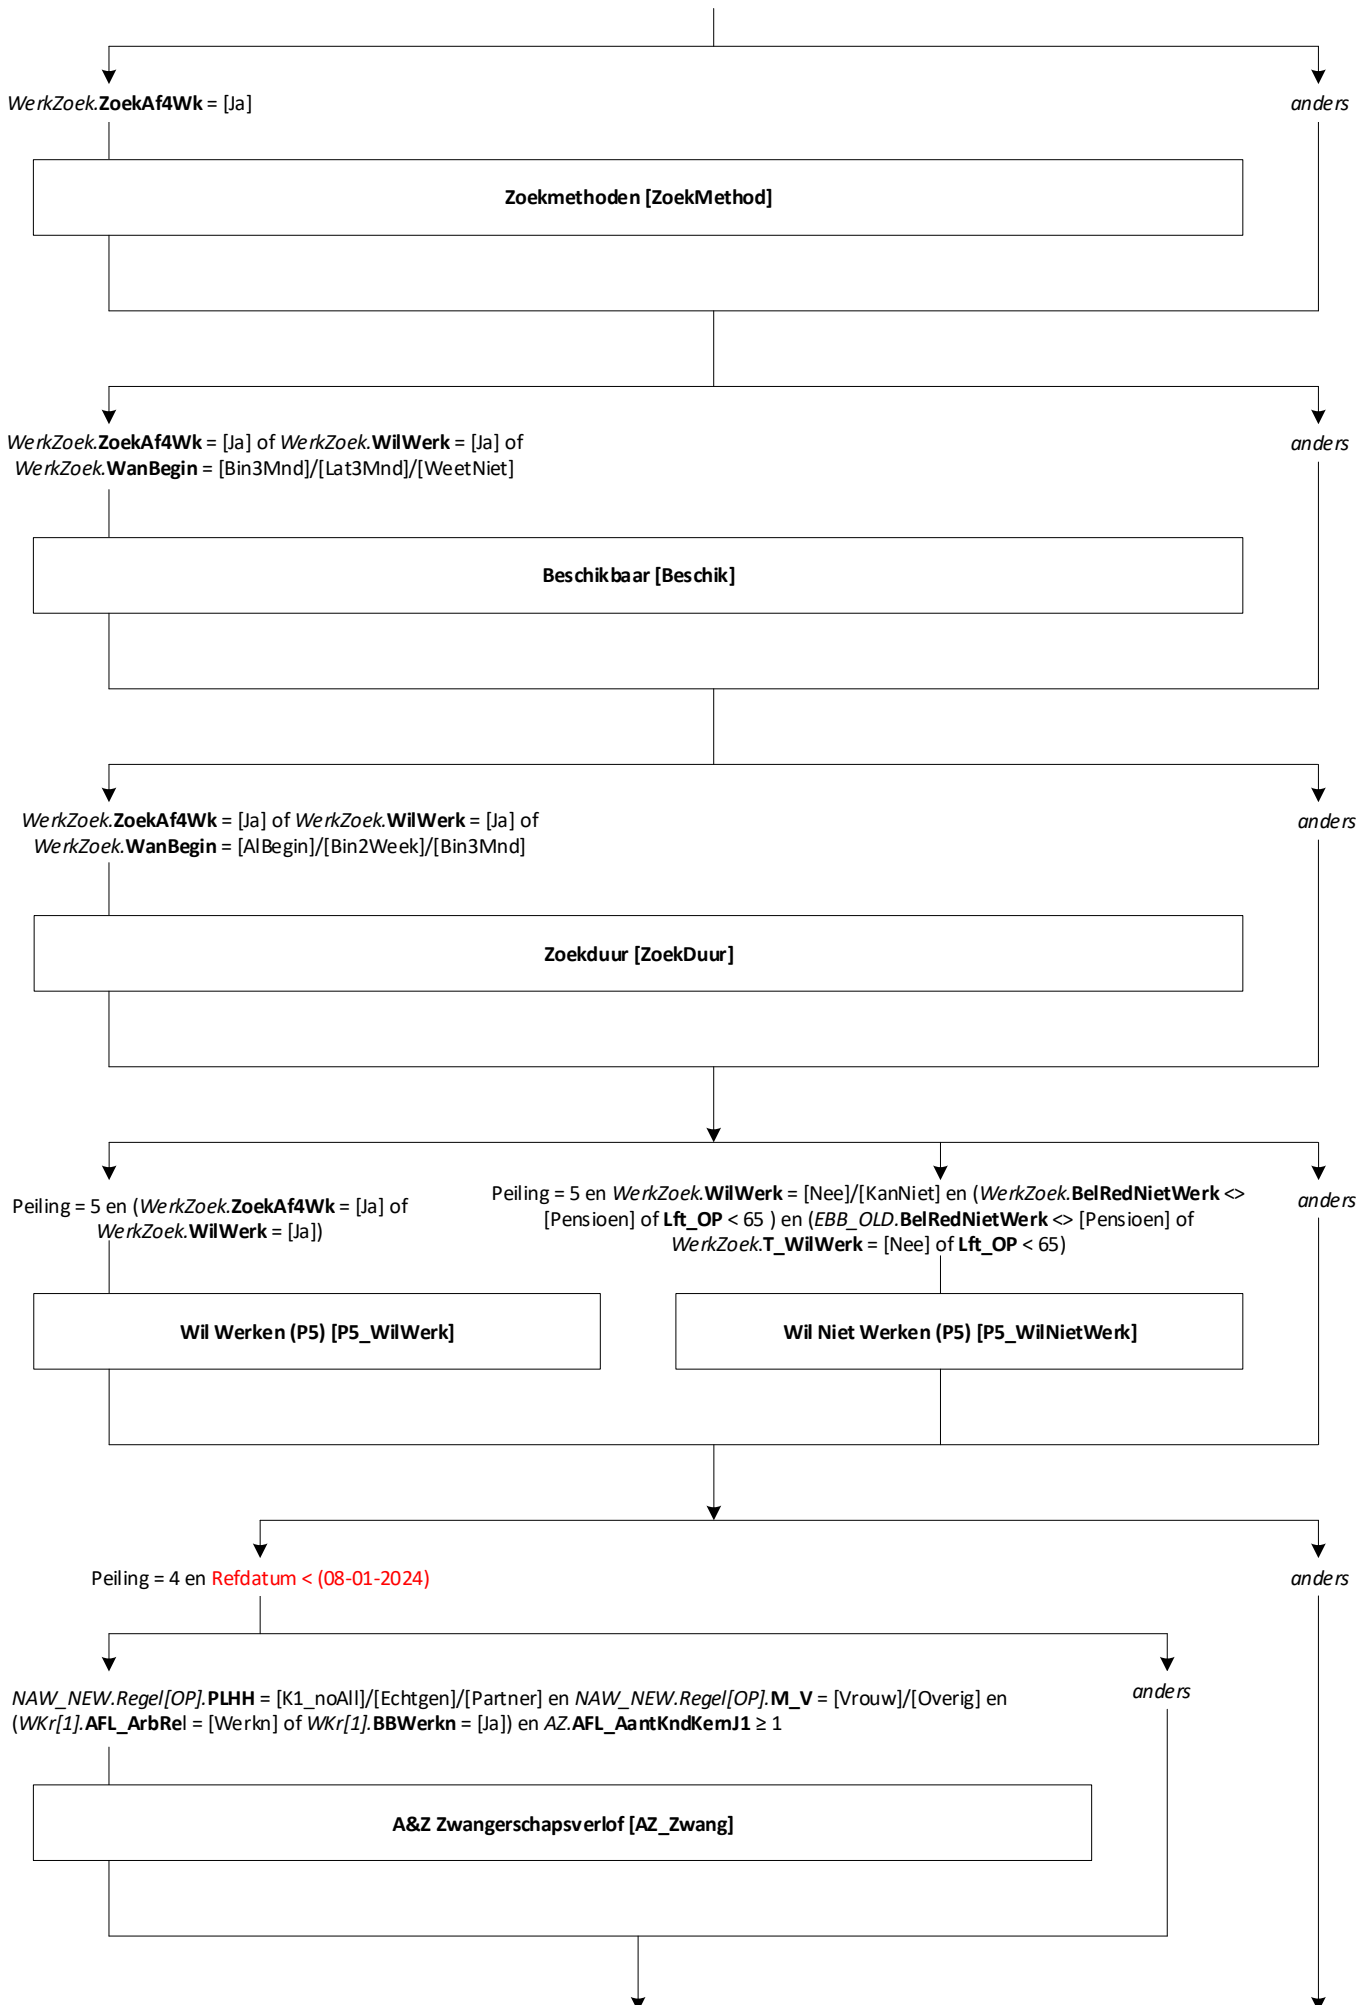

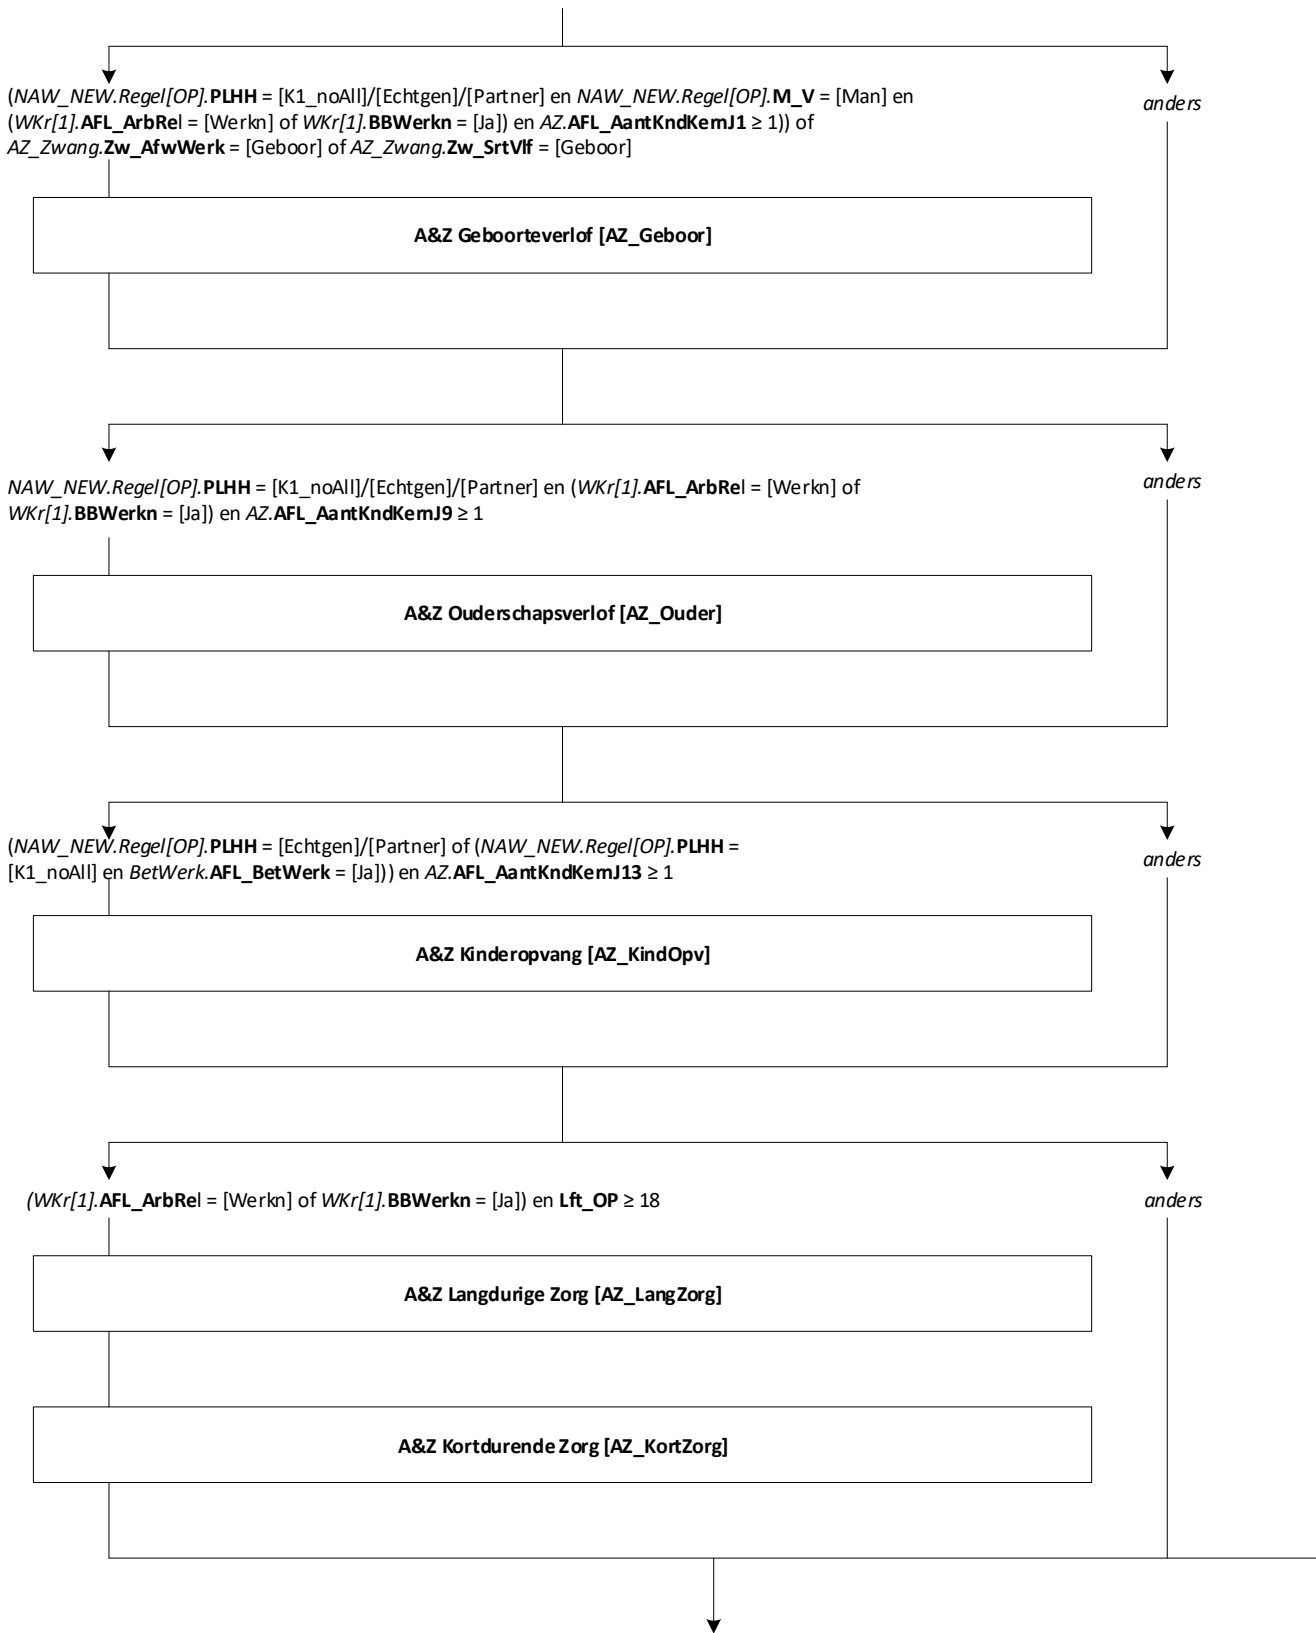

Blokkenschema

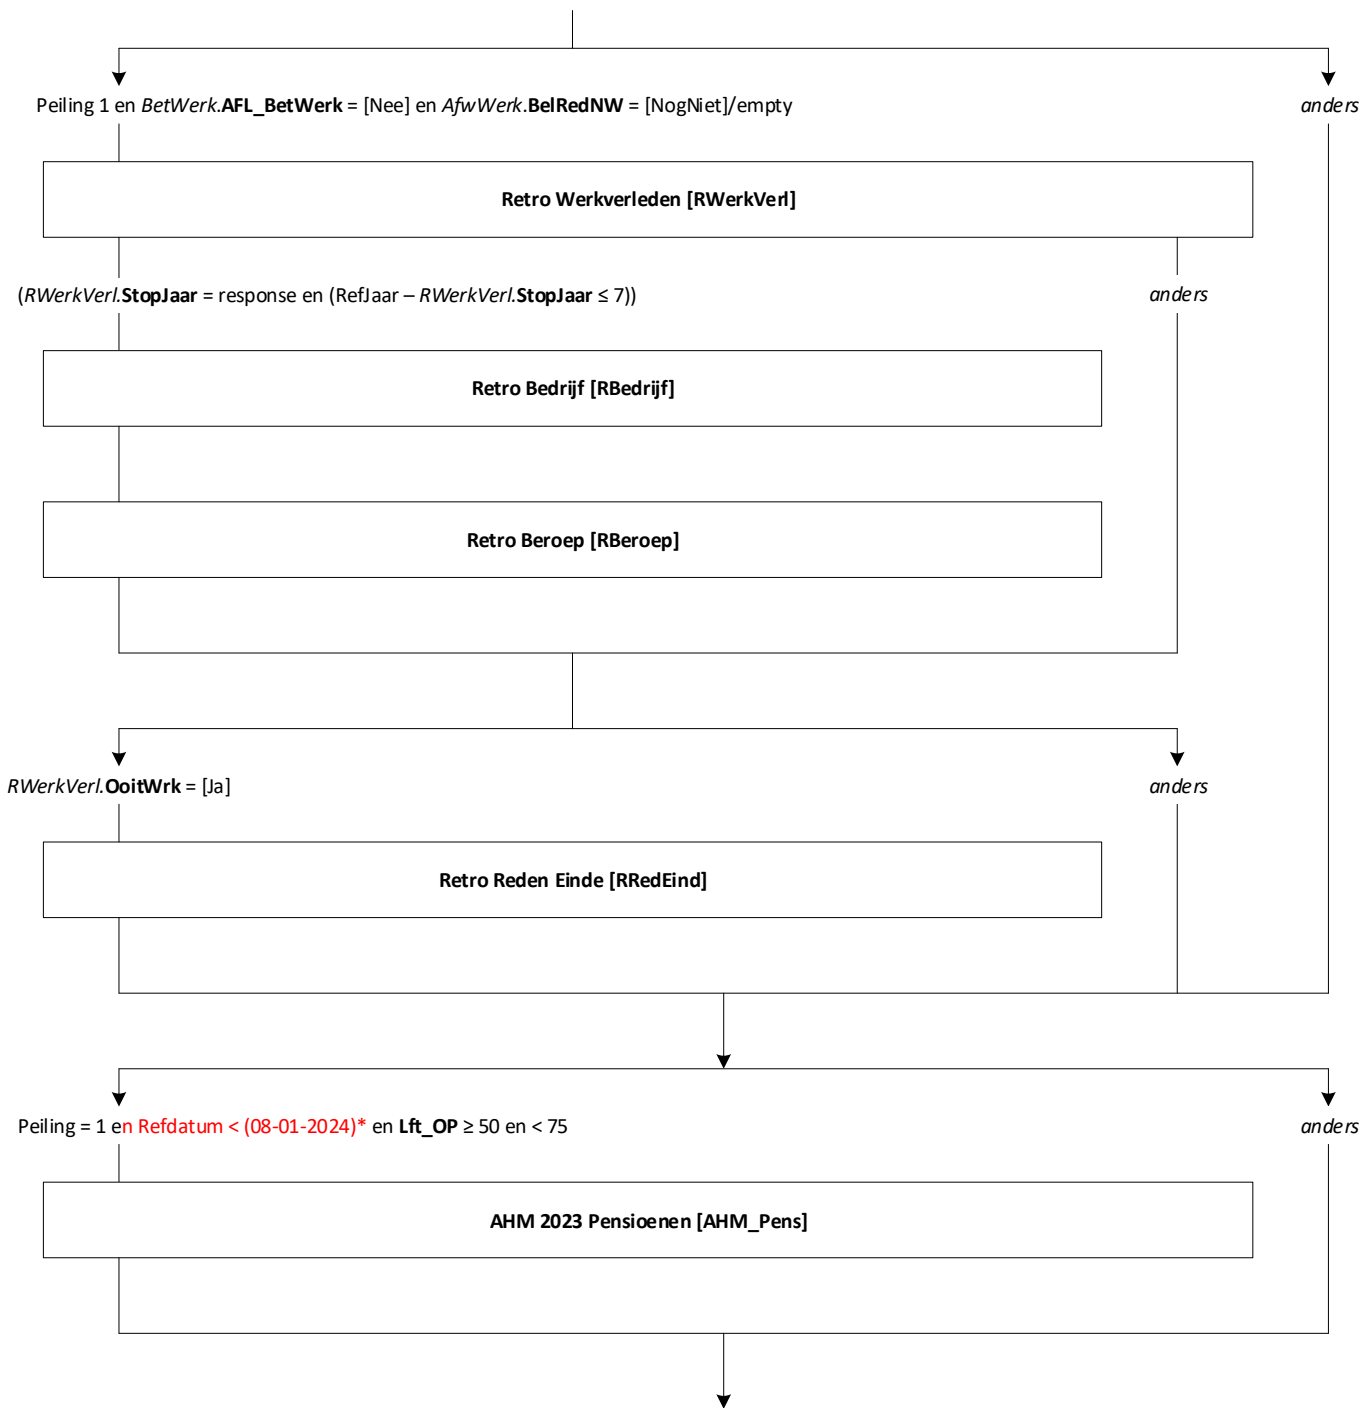

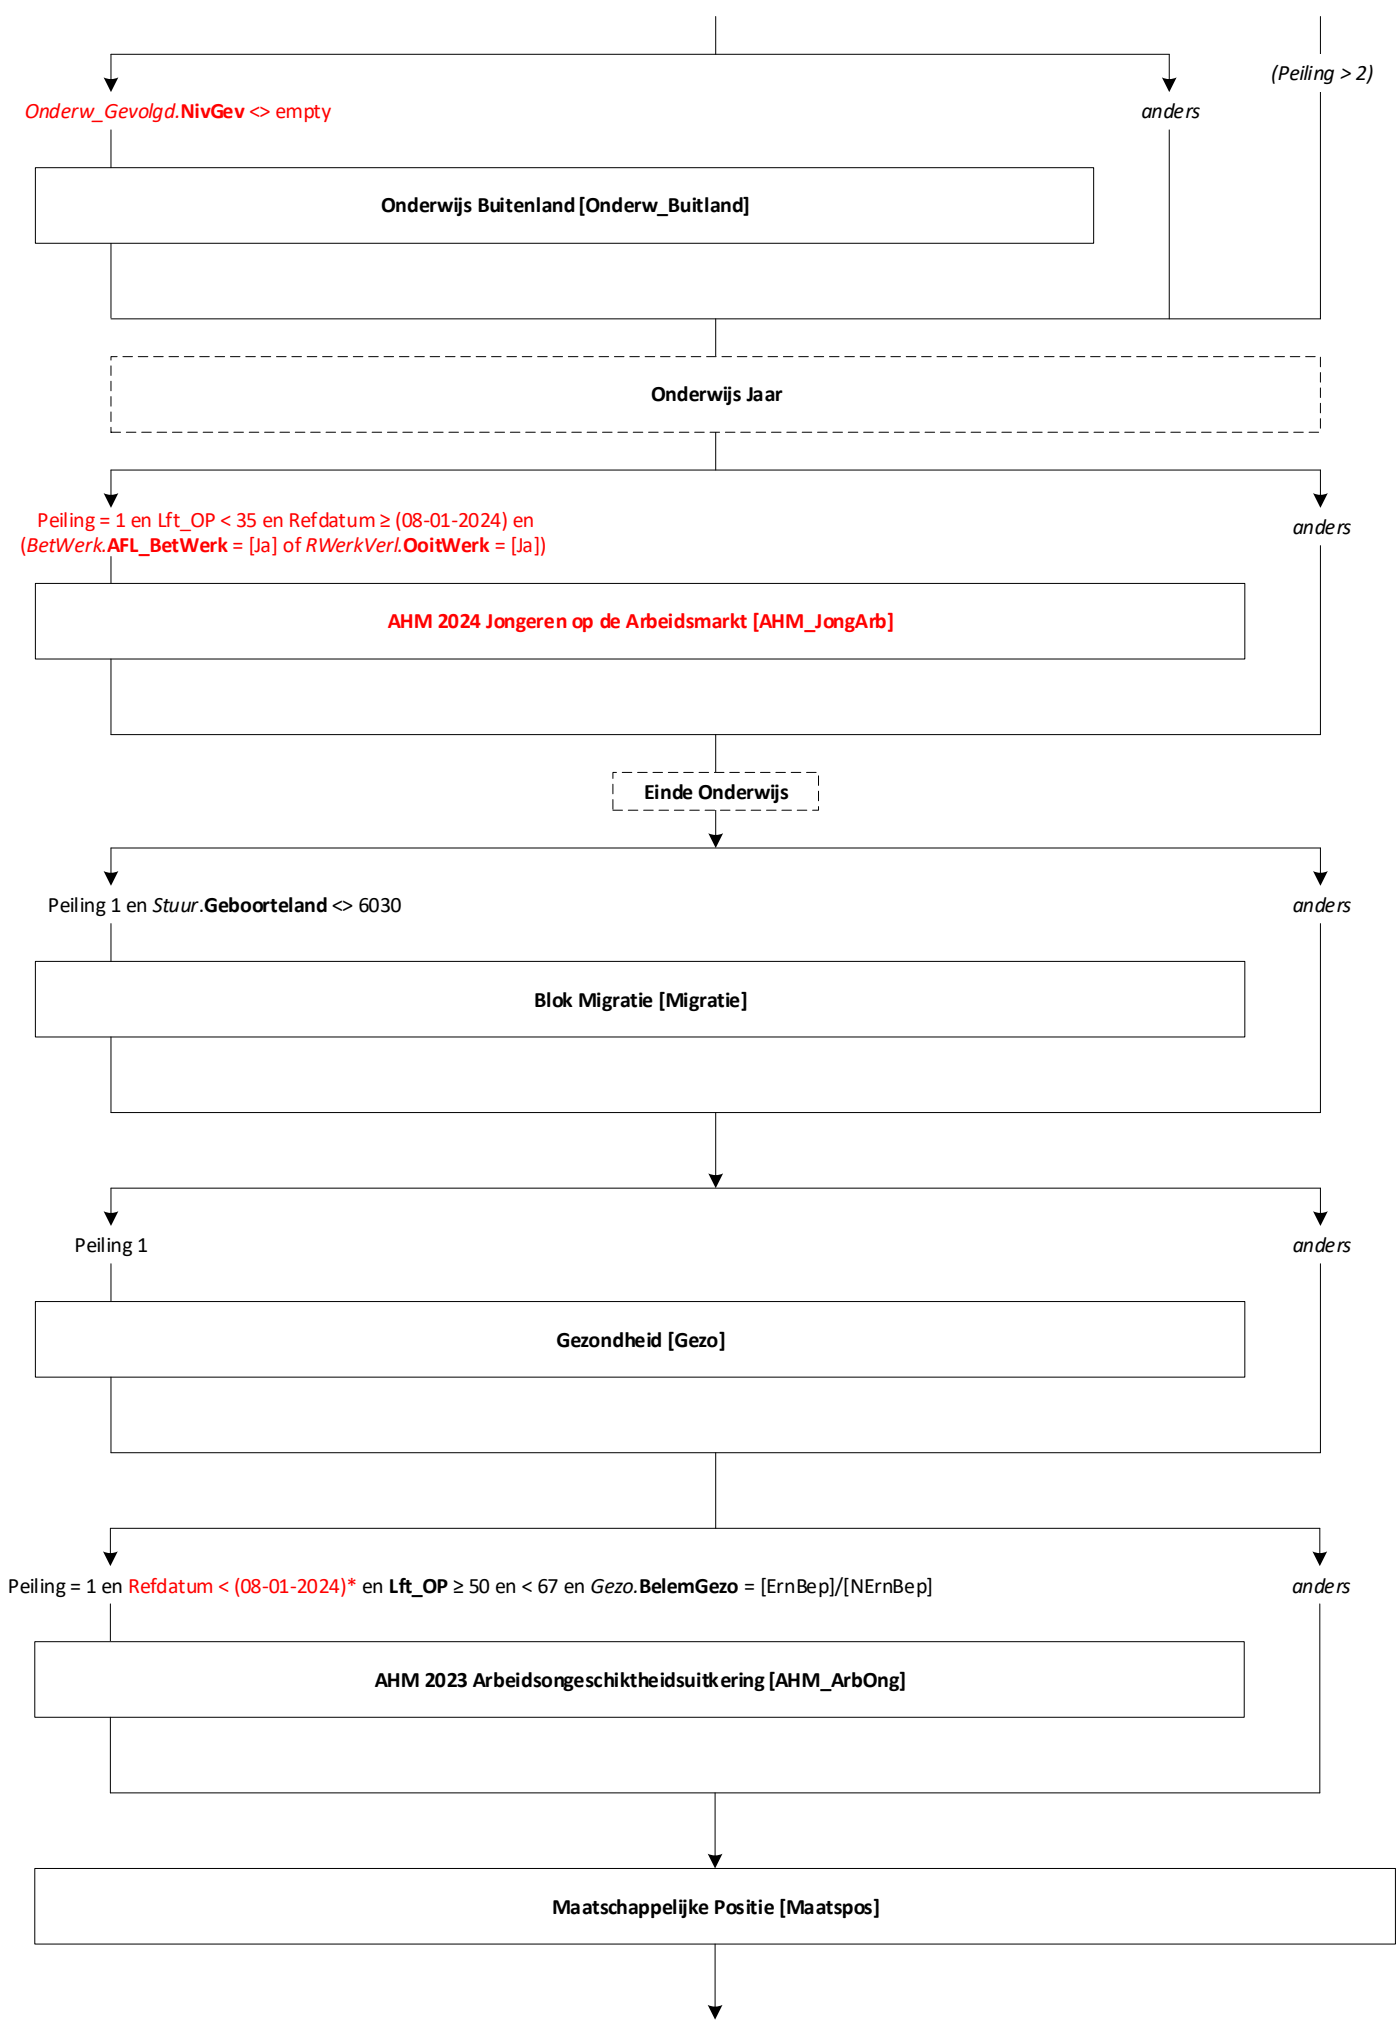

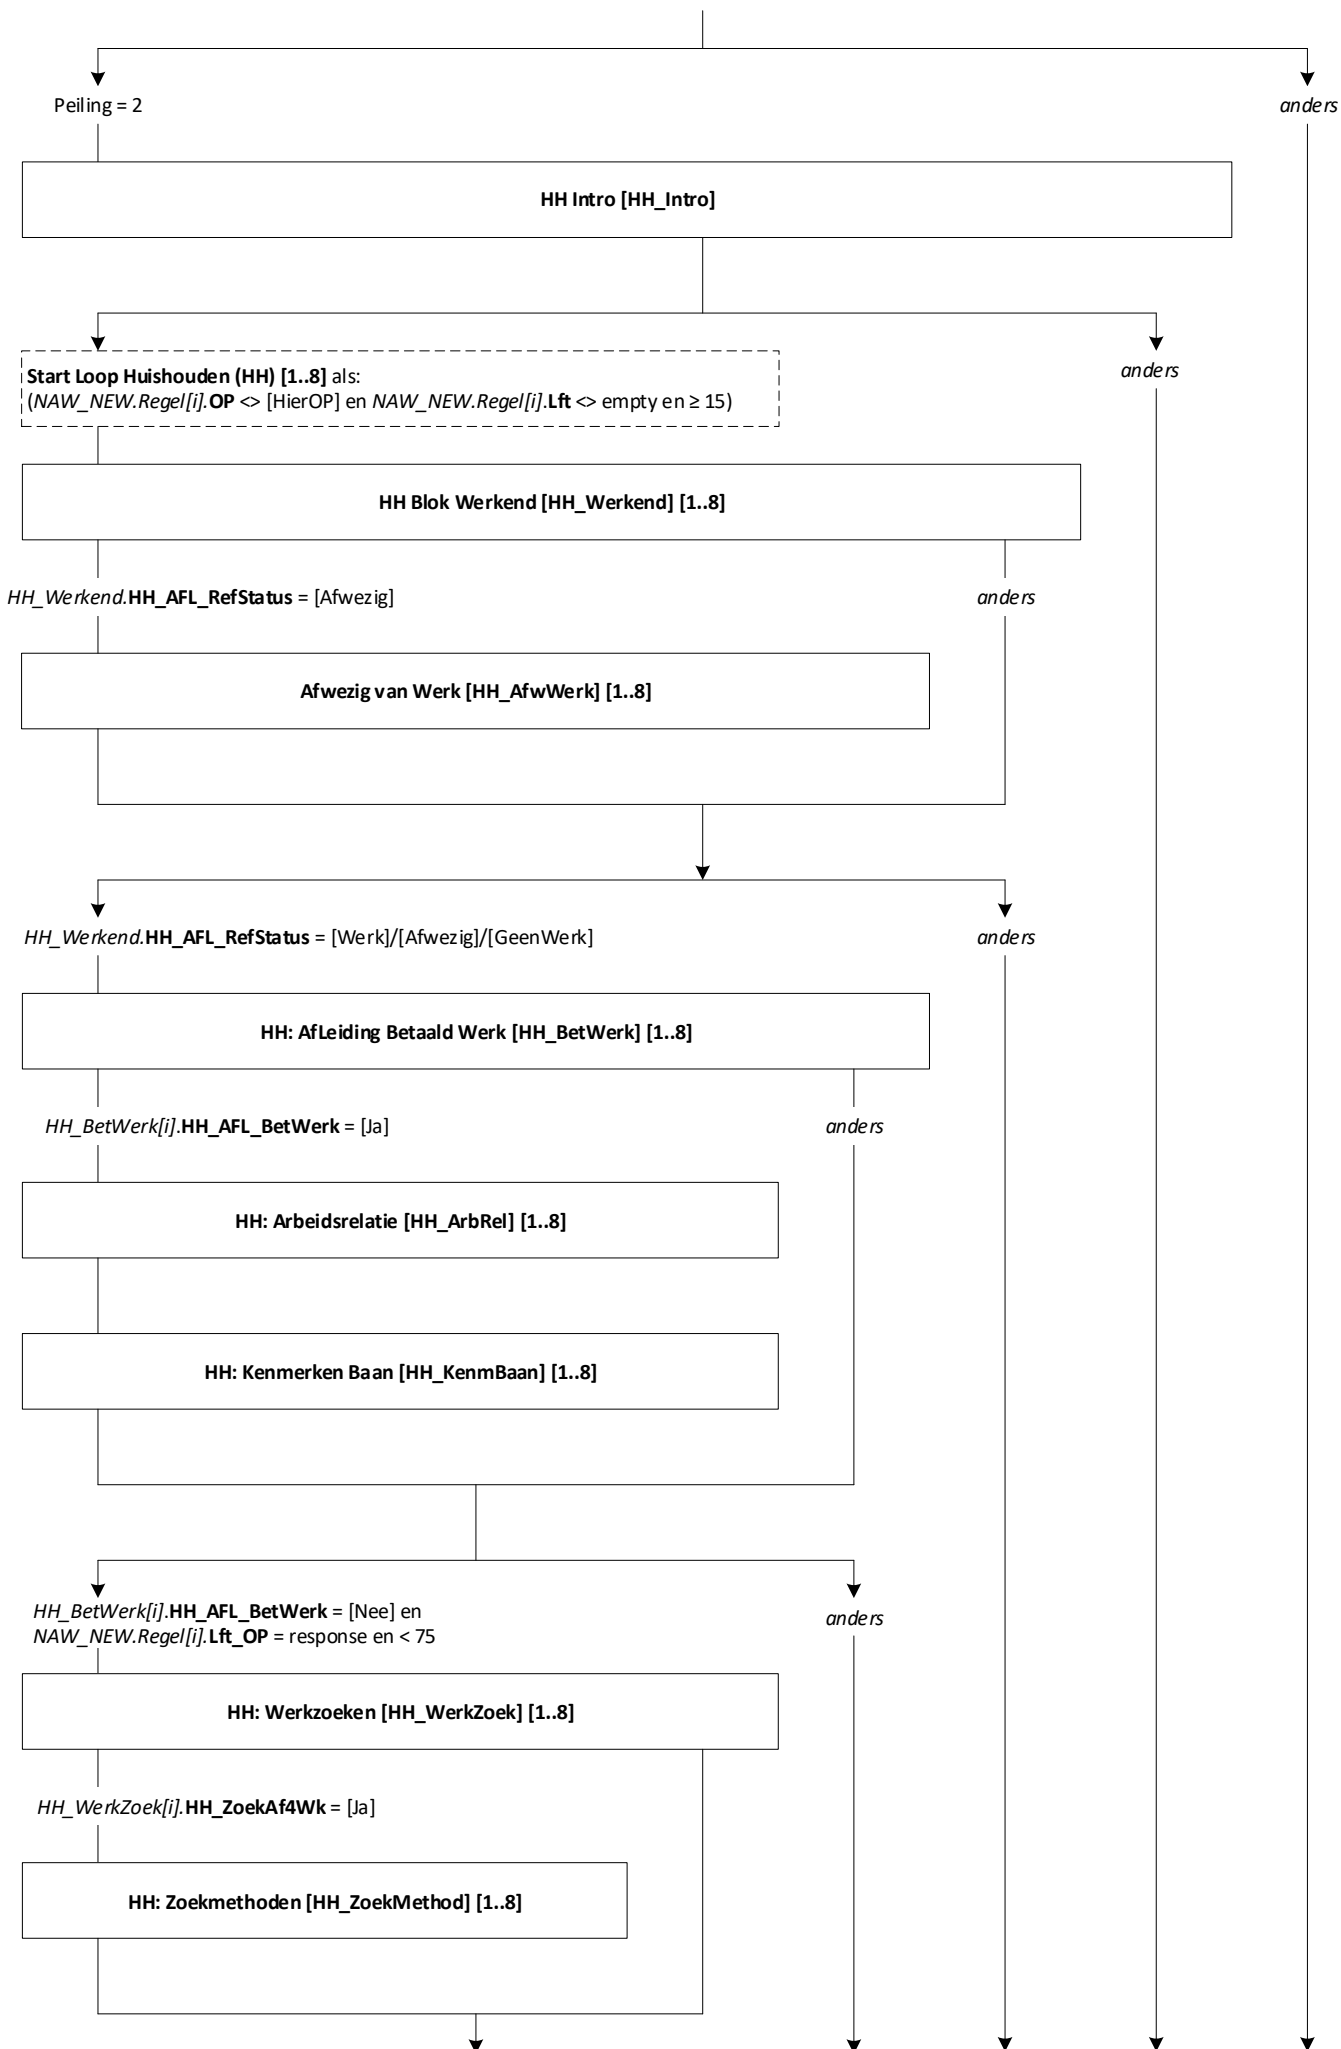

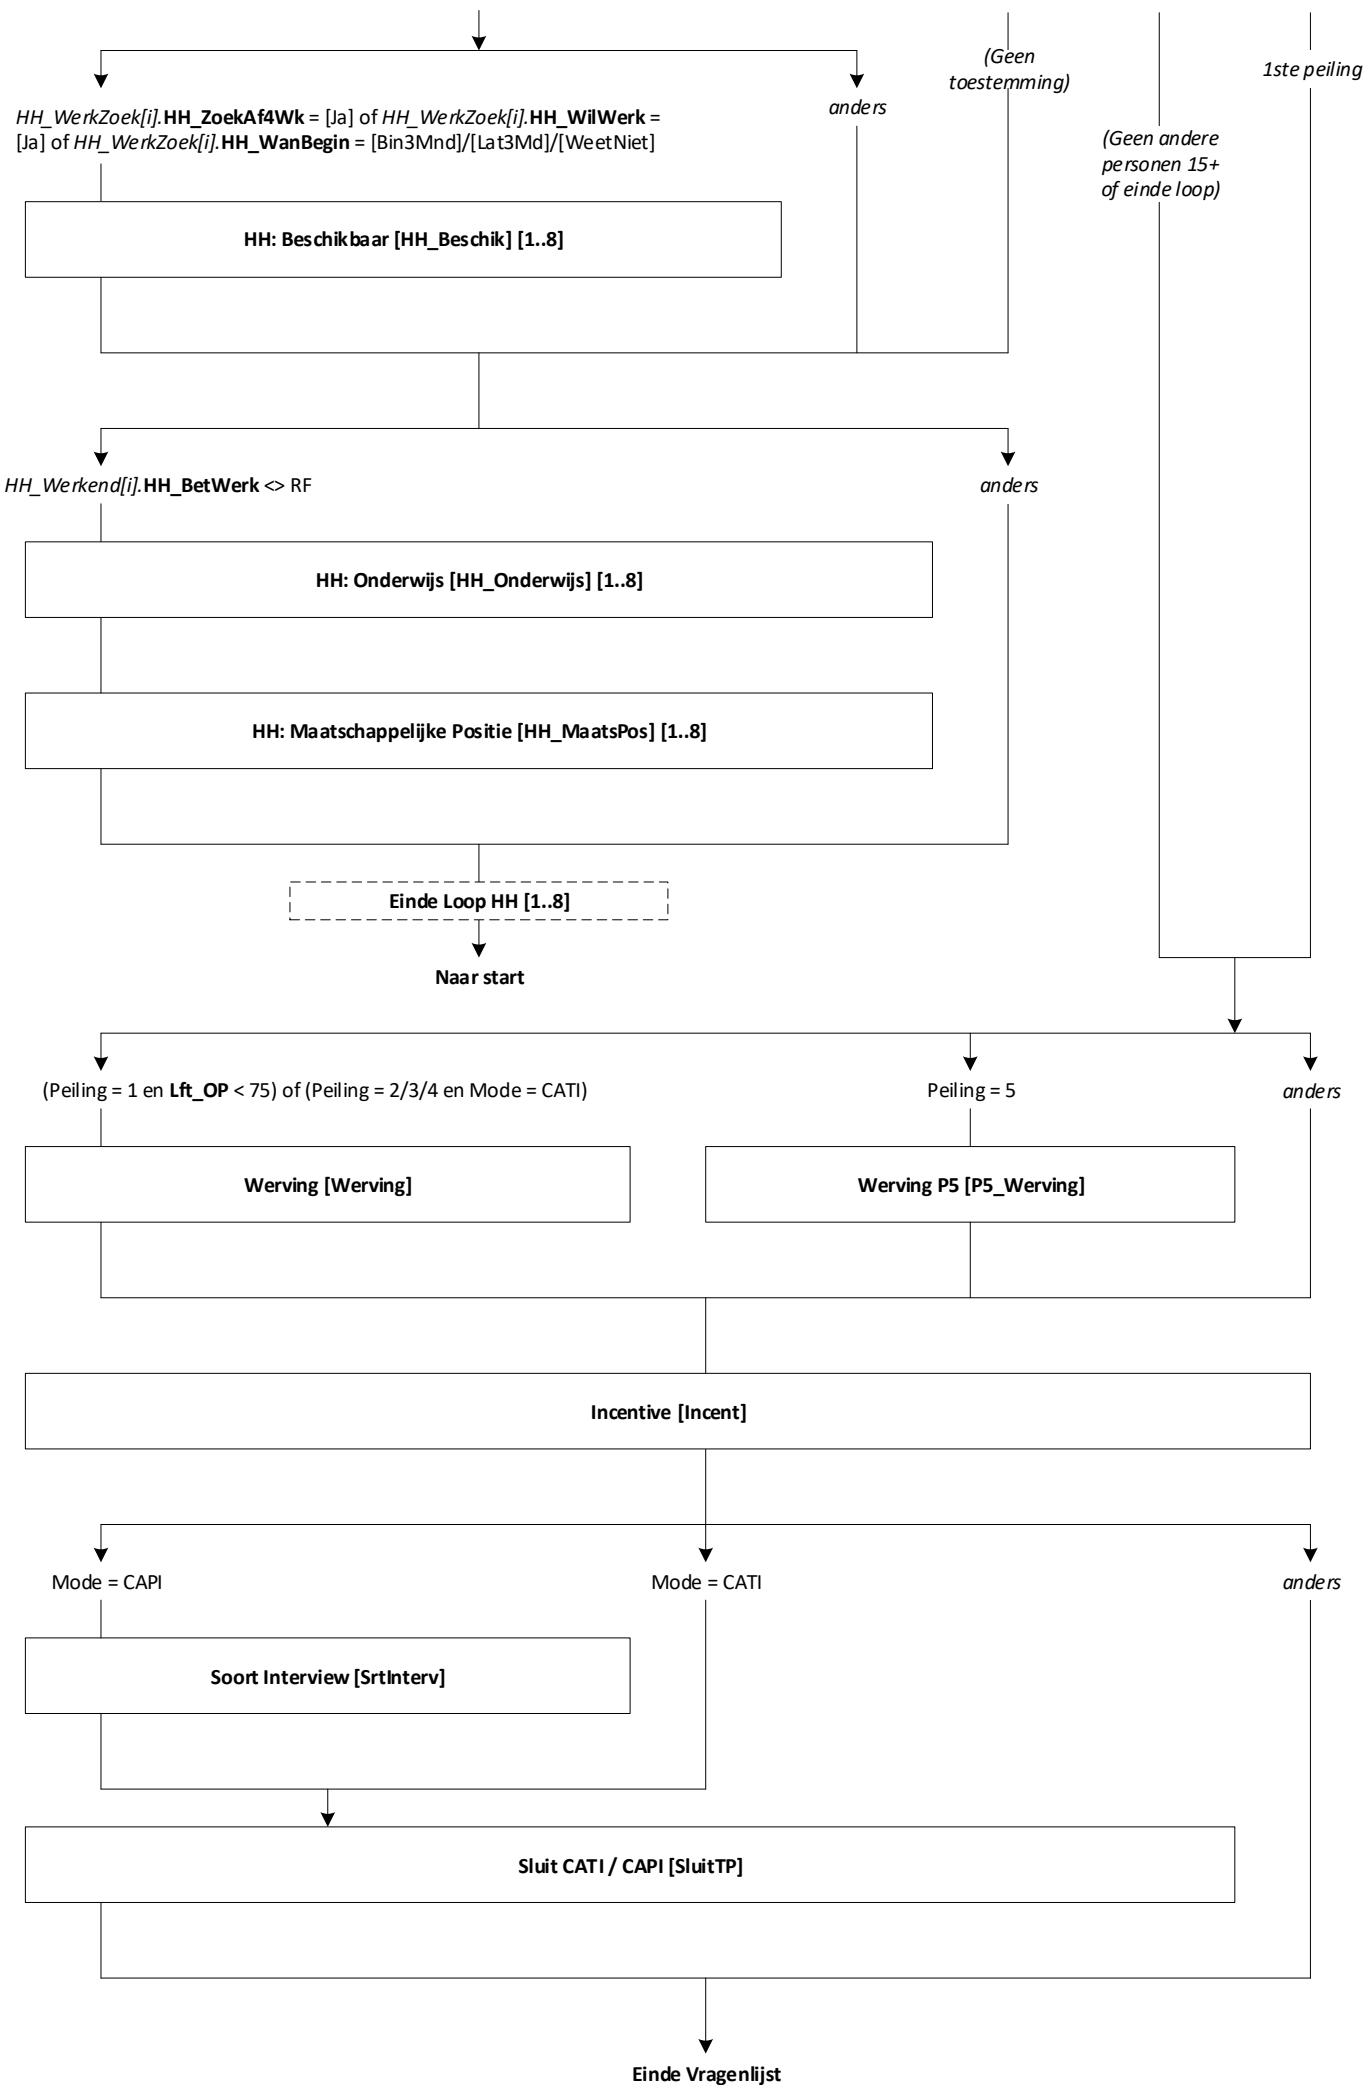

Werkkring 1:

AFL_ArbRelWrk1 = *Main.Stuur.EBB.AFL_ArbRelWrk1*
BBUitz1 = *Main.Stuur.EBB.BBUitz1*
UitzDetach1 = *Main.Stuur.EBB.UitzDetach1*
NaamWerkn1 = *Main.Stuur.EBB.NaamWerkn1*
NaamUitz1 = *Main.Stuur.EBB.NaamUitz1*
AantDetach1 = *Main.Stuur.EBB.AantDetach1*
NaamDetach1 = *Main.Stuur.EBB.NaamDetach1*
NaamEigen1 = *Main.Stuur.EBB.NaamEigen1*
NaamMeewerk1 = *Main.Stuur.EBB.NaamMeewerk1*
AFL_TijdVast1 = *Main.Stuur.EBB.AFL_TijdVast1*
SindsJaar1 = *Main.Stuur.EBB.SindsJaar1*
SindsMnd1 = *Main.Stuur.EBB.SindsMnd1*
AFL_ContrUren1 = *Main.Stuur.EBB.AFL_ContrUren1*
AFL_GemUren1 = *Main.Stuur.EBB.AFL_GemUren1*

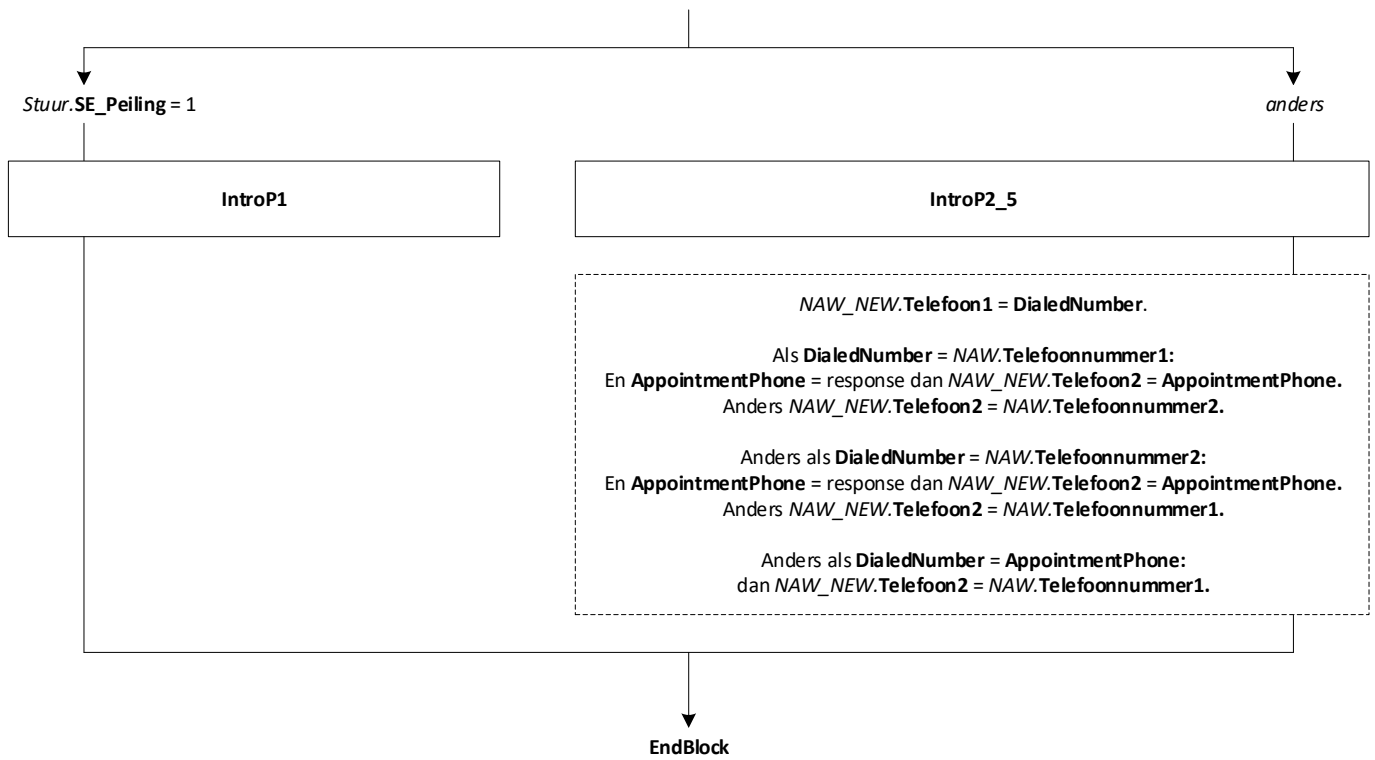

Werkkring 2:

AFL_ArbRelWrk2 = *Main.Stuur.EBB.AFL_ArbRelWrk2*
BBUitz2 = *Main.Stuur.EBB.BBUitz2*
UitzDetach2 = *Main.Stuur.EBB.UitzDetach2*
NaamWerkn2 = *Main.Stuur.EBB.NaamWerkn2*
NaamUitz2 = *Main.Stuur.EBB.NaamUitz2*
AantDetach2 = *Main.Stuur.EBB.AantDetach2*
NaamDetach2 = *Main.Stuur.EBB.NaamDetach2*
NaamEigen2 = *Main.Stuur.EBB.NaamEigen2*
NaamMeewerk2 = *Main.Stuur.EBB.NaamMeewerk2*
AFL_TijdVast2 = *Main.Stuur.EBB.AFL_TijdVast2*
SindsJaar2 = *Main.Stuur.EBB.SindsJaar2*
SindsMnd2 = *Main.Stuur.EBB.SindsMnd2*
AFL_ContrUren2 = *Main.Stuur.EBB.AFL_ContrUren2*
AFL_GemUren2 = *Main.Stuur.EBB.AFL_GemUren2*

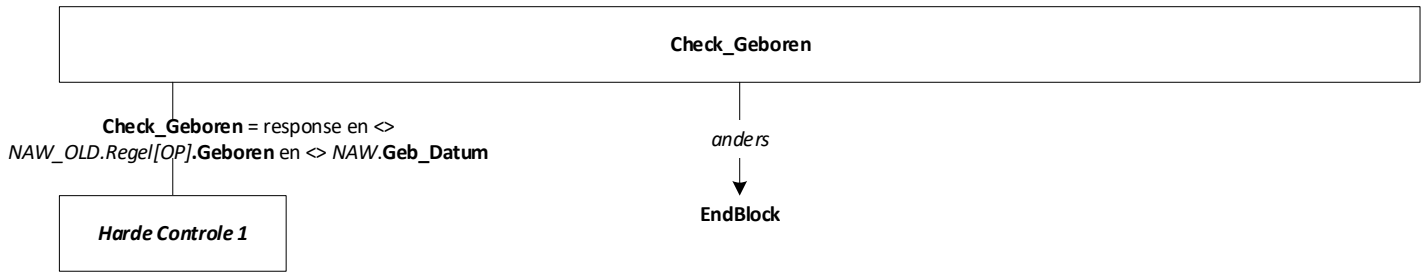

Overig:

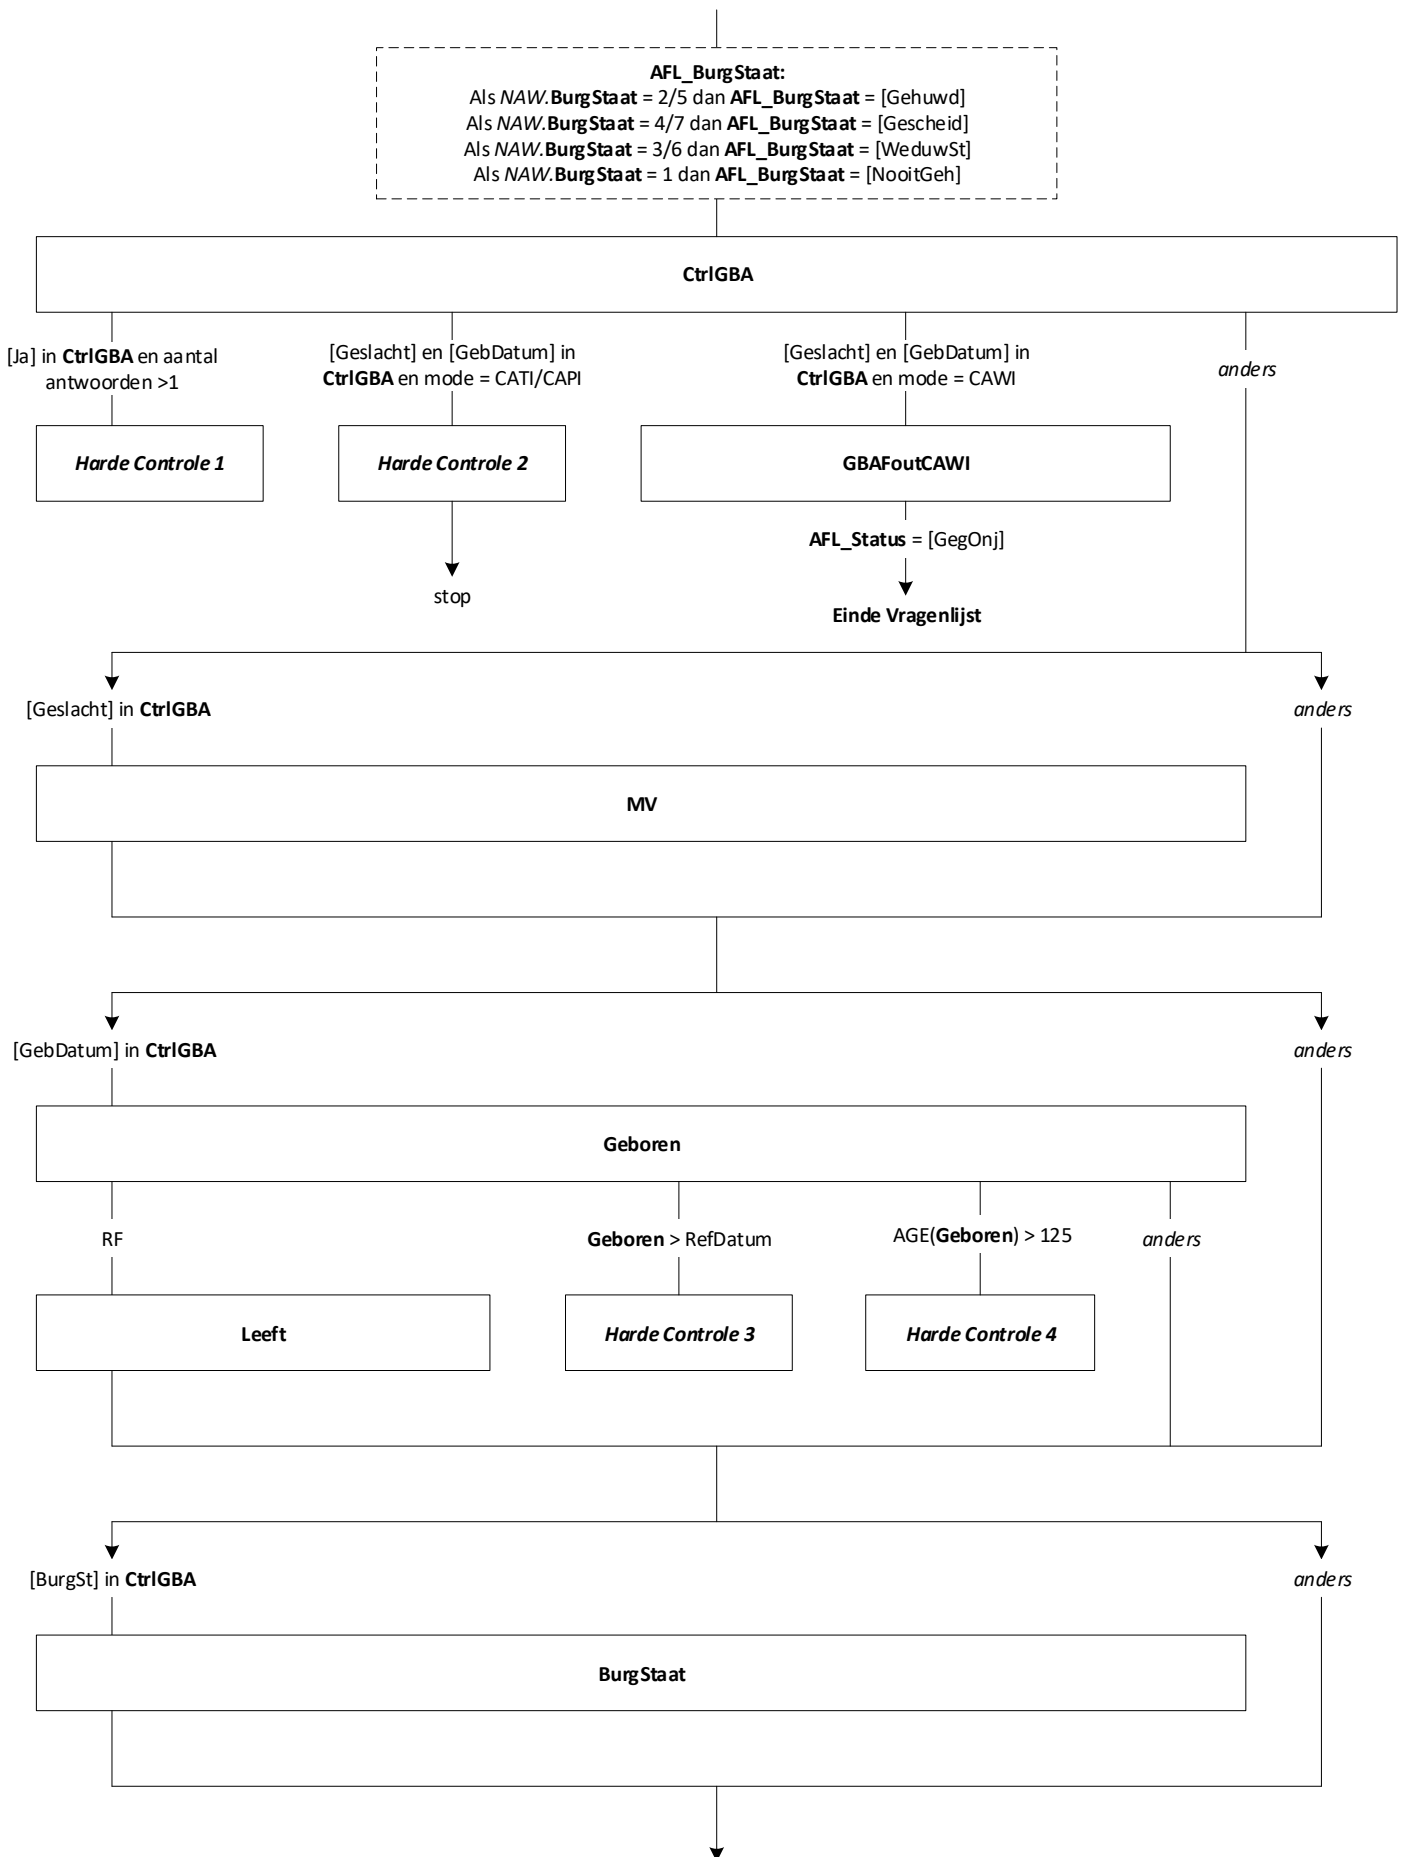

FullPart = *Main.Stuur.EBB.FullPart*
WilWerk = *Main.Stuur.EBB.WilWerk*
BelRedNietWerk = *Main.Stuur.EBB.BelRedNietwerk*
ActODuur = *Main.Stuur.EBB.ActODuur*
Naam = *Main.Stuur.EBB.Naam*
NivAct = *Main.Stuur.EBB.NivAct*

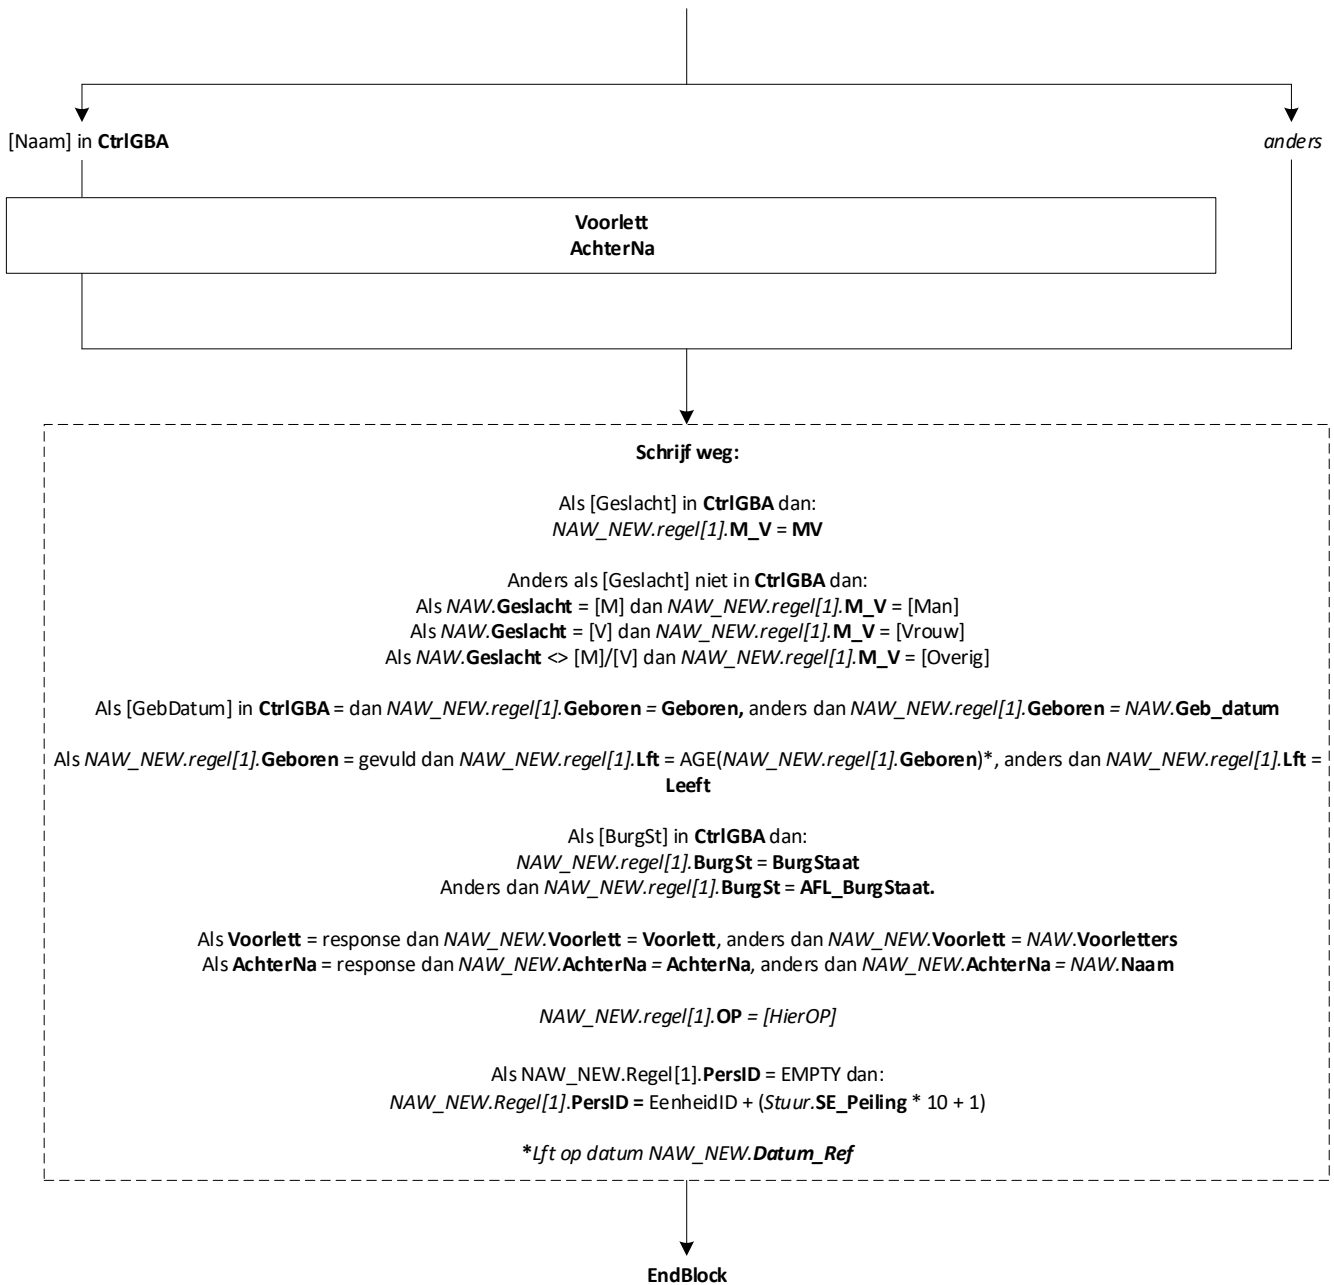

EndBlock

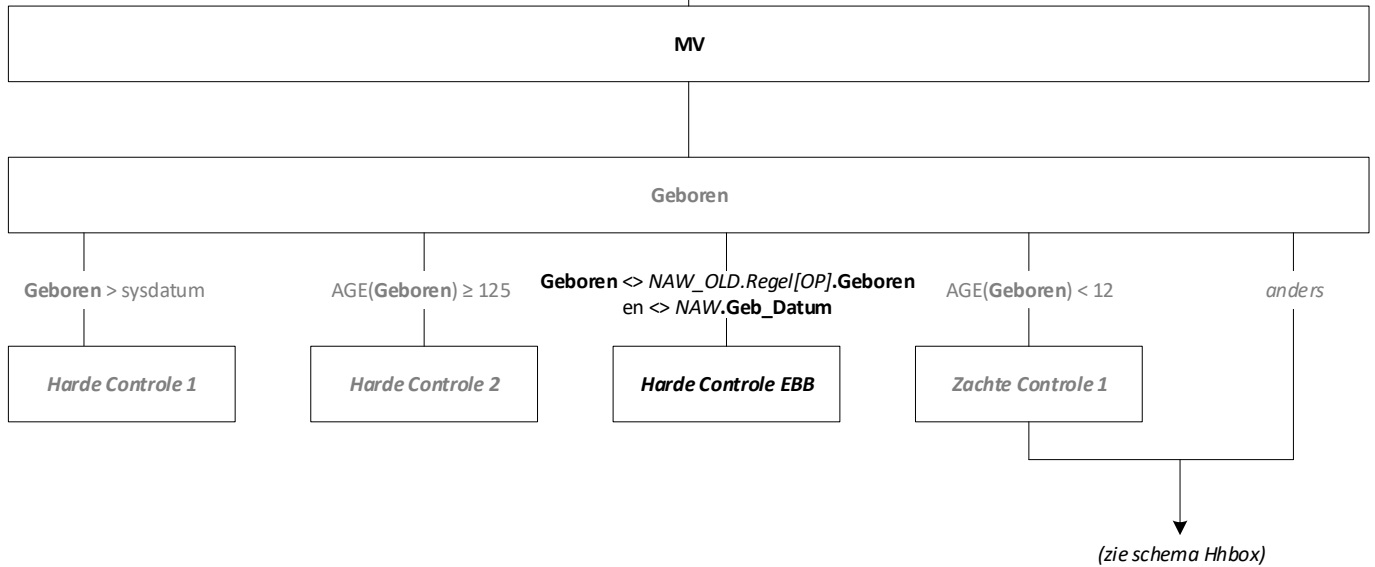

Zie routeschema van de huishoudbox (op aanvraag: standaardblokken, B5 huishoudbox).
Wijziging voor de EBB: flexibele intro (MV) en de toevoeging van de Harde Controle EBB (op geboortedatum)

**In de EBB wordt de huishoudbox pas in peiling 2 gesteld (soms peiling 3).
 Voor verwerking is het belangrijk dat de OP hetzelfde PersID heeft gedurende alle peilingen. Het automatisch aangemaakte PersID voor de OP in de huishoudbox zal voor de EBB daarom éénmalig worden overschreven met het PersID dat is aangemaakt in de eerste peiling onder de volgende voorwaarde (nb: in de vervolgepeilingen gaat dit automatisch goed) :*

Als `NAW_OLD.AantalPP = empty` en `Peiling > 1` en `PeilStart = [Ja]` dan:

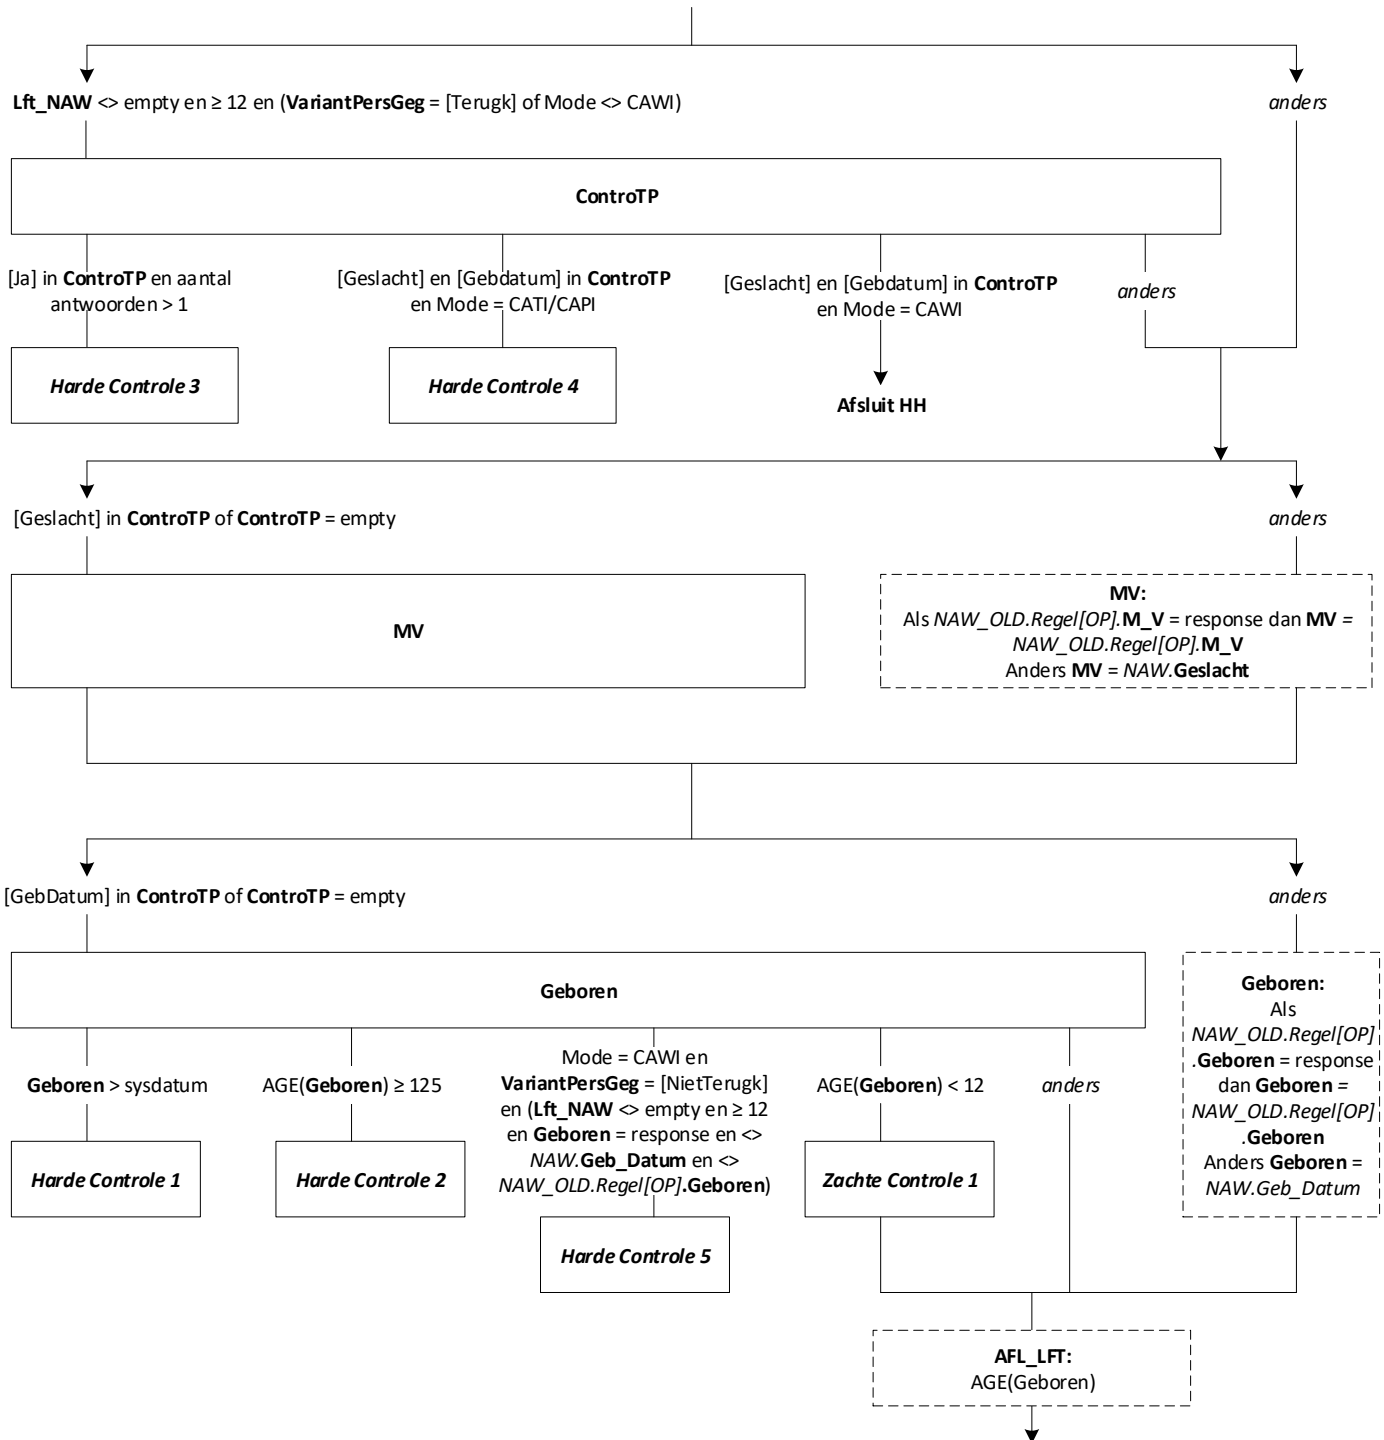

`NAW_NEW.Regel[OP].PersID = NAW_OLD.Regel[1].PersID`

Zie routeschema van de huishoudbox (op aanvraag: standaardblokken, B5 huishoudbox).

VariantPersGeg = [NietTerugk]

Wijzigingen voor de EBB:

De check op geboortedatum gebeurt normaal op NAW.Geboren. Voor de EBB is het echter ook in orde als de opgegeven geboortedatum overeenkomt met de geboortedatum uit de vorige peiling (uit NAW_OLD). Bij CATI worden de gegevens uit NAW_OLD teruggekoppeld ipv NAW (kunnen aangepast zijn). Vullen van MV en Geboren gaat daarom ook op basis van de NAW_OLD gegevens.

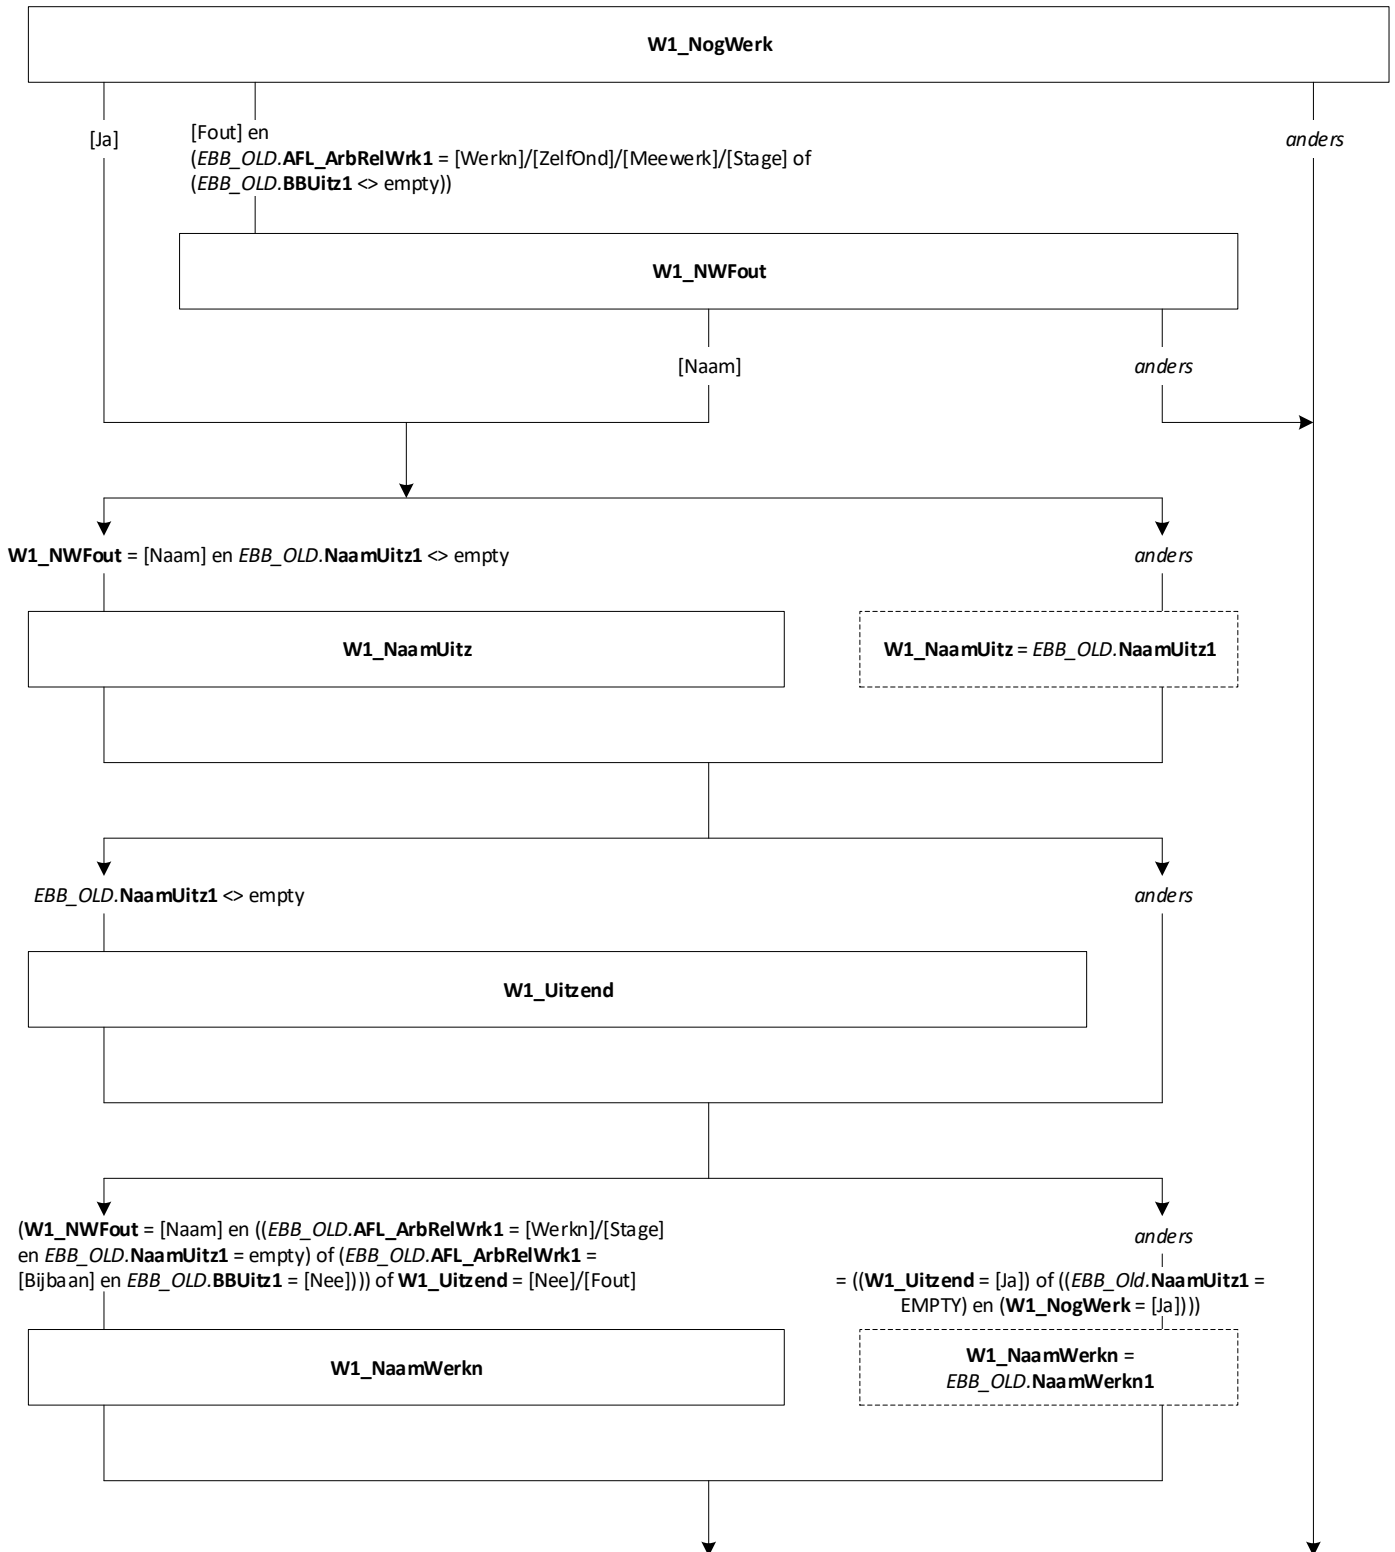

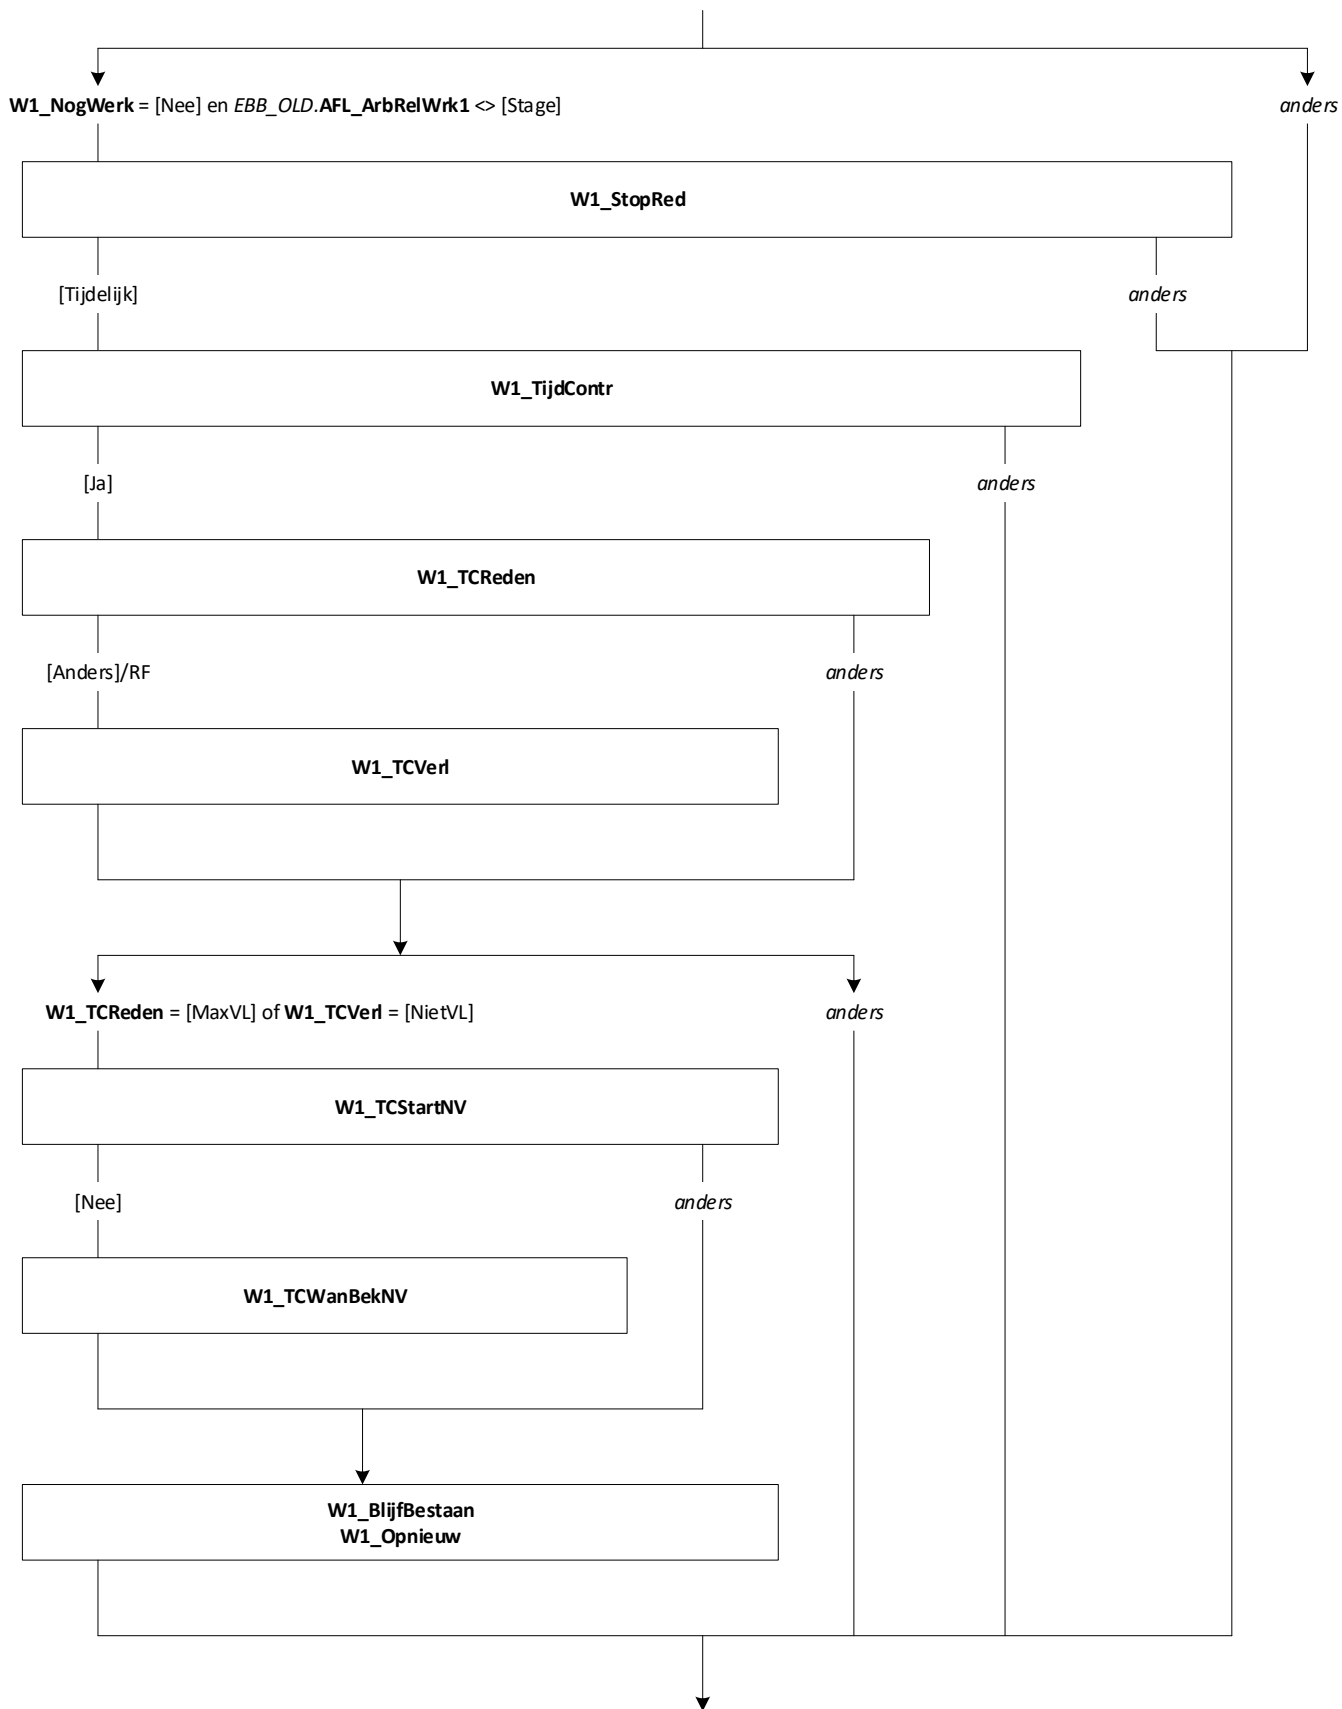

Blok Panelhuishoudbox

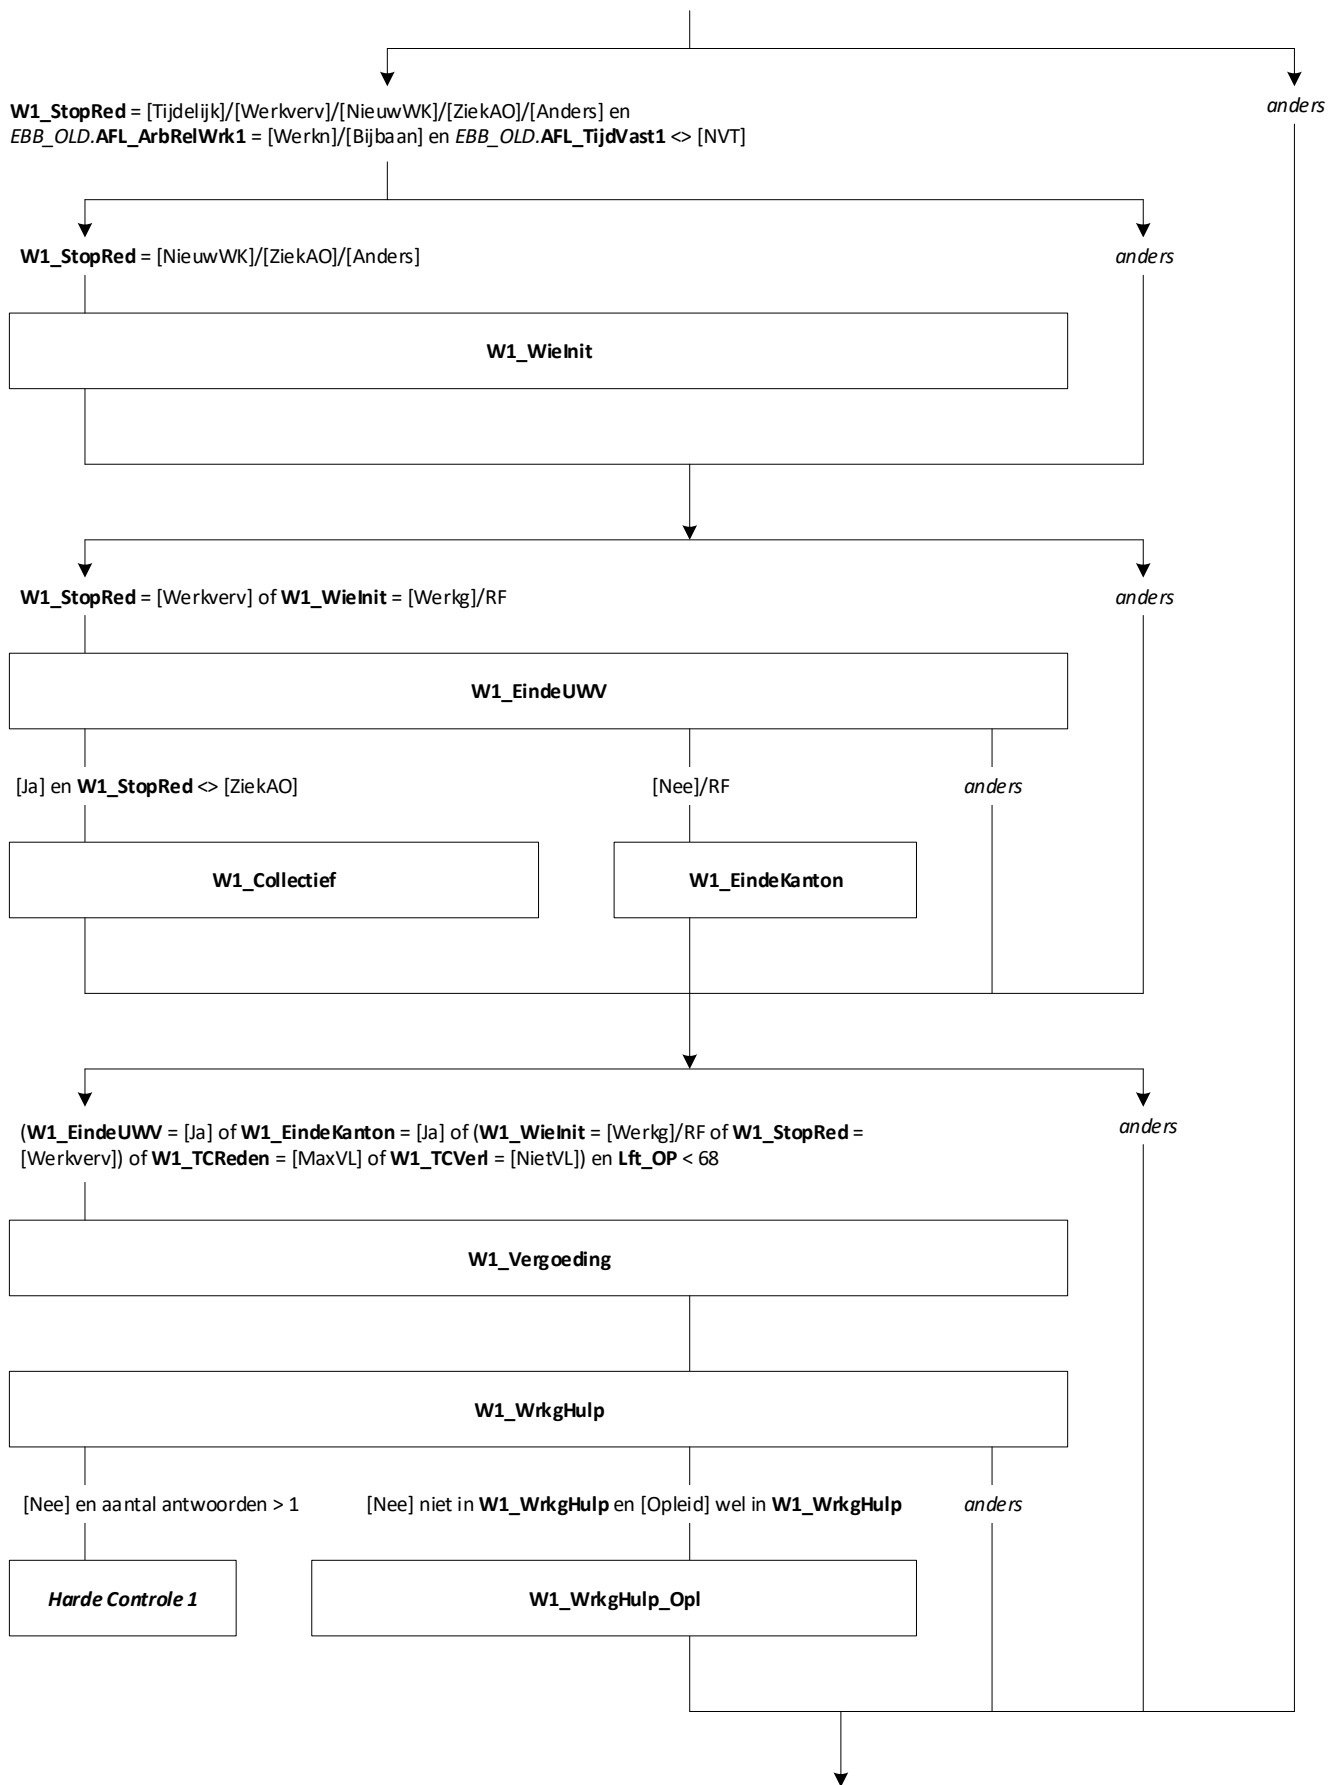

Mode = CAWI, CATI, CAPI
Blokvoorwaarde = *NAW_OLD.AantalPP* <> empty
Blokattributen = NODK, RF, NO EMPTY

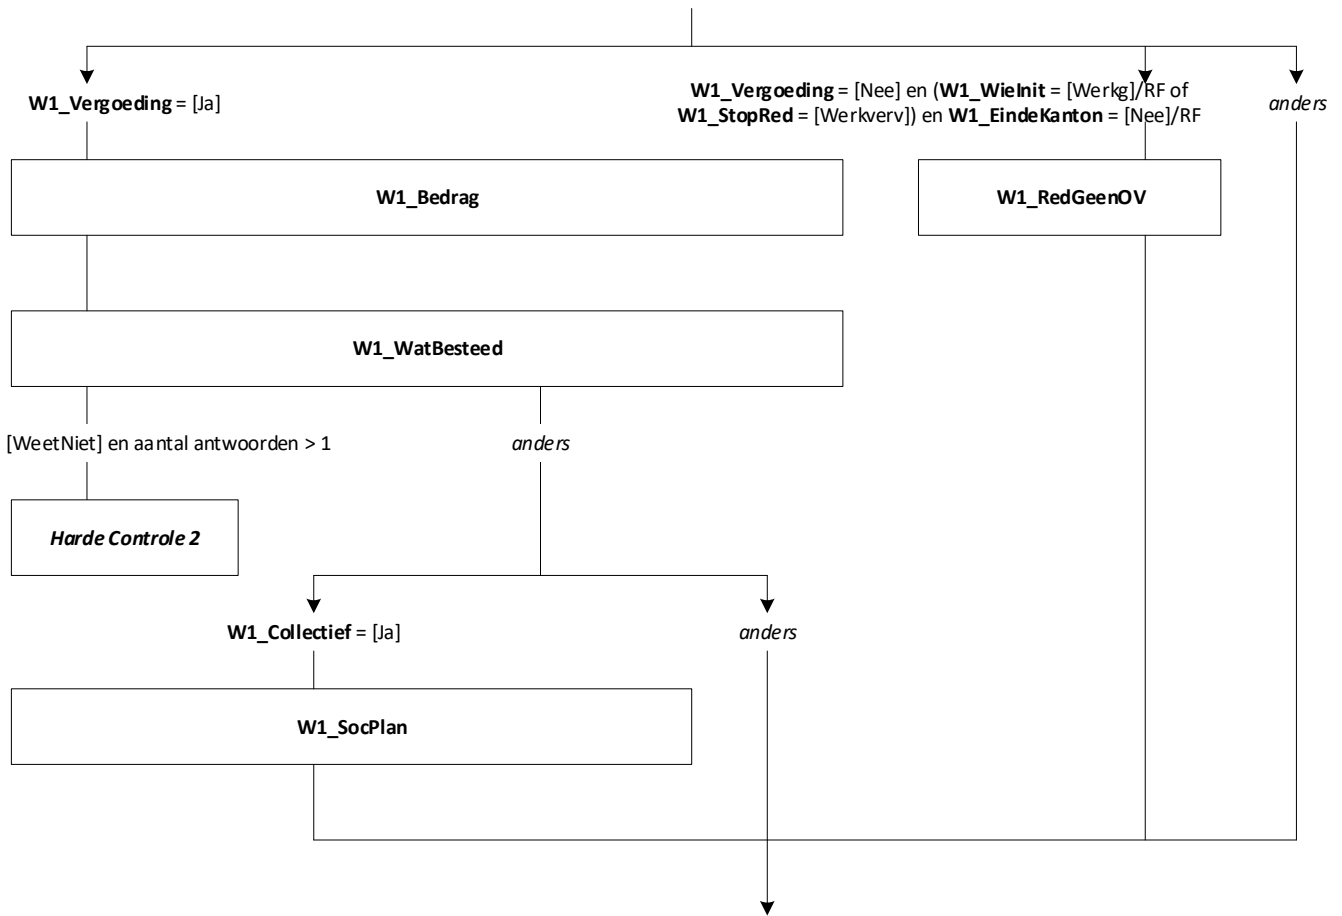

Zie routeschema van de panelhuishoudbox (op aanvraag: standaardblokken, B5 panelhuishoudbox).
