## TABLES

## belonging to the Occasional paper:

## A SOCIAL ACCOUNTING MATRIX FOR THE NETHERIANDS concepts and results

Jolanda G. Timmerman
Peter J.M. van de Ven

Nr. NA-068 (part II)
1994

The views expressed in this paper are those of the authors and do not necessarily reflect the views of Statistics Netherlands.

## List of tables

1 Consolidated SAM for the Netherlands, 1988 (in milliard guilders)
2 Consolidated SAM for the Netherlands, 1990 (in milliard guilders)
3 Consolidated SAM for the Netherlands, average annual growth rates 1988-1990 (in 8)
4 GDP at factor cost by primary input category and by industry, 1990 (in million guilders)
5 Average annual growth rates of GDP at factor cost by primary input category and by industry, 1988-1990 (in \%)
6.a Paid employment by type of employed person and by industry, 1990 (in 1000 full-time equivalents)
6.b Self-employment by type of employed person and by industry, 1990 (in 1000 full-time equivalents)
6.c Total employment by type of employed person and by industry, 1990 (in 1000 full-time equivalents)
7.a Average annual growth rates of paid employment by type of employed person and by industry, 1988-1990 (in \%)
7.b Average annual growth rates of self-employment by type of employed person and by industry, 1988-1990 (in \%)
7.c Average annual growth rates of total employment by type of employed person and by industry, 1988-1990 (in \%)
8 Wage rates by type of employed person (employees) and by industry, 1990 (in 1000 guilders)

9 Average annual growth rates of wage rates by type of employed person (employees) and by industry, 1988-1990 (in \%)
10.1 Generated income by sector and by primary input category, 1990 (in million guilders)
10.2 Wages and salaries by household group and by type of employed person, 1990 (in million guilders)
11 Average annual growth rates of wages and salaries by household group and by type of employed person, 1988-1990 (in 8)
12.1.a Paid employment by household group and by type of employed person, 1990 (in 1000 full-time equivalents)
12.1.b Self-employment by household group and by type of employed person, 1990 (in 1000 full-time equivalents)
12.1.c Total employment by household group and by type of employed person, 1990 (in 1000 full-time equivalents)
12.2.a Paid employment by household group and by type of employed person, 1990 (in 1000 full-time equivalents)
12.2.b Self-employment by household group and by type of employed person, 1990 (in 1000 full-tine equivalents)
12.2.c Total employment by household group and by type of employed person, 1990 (in 1000 full-time equivalents)
13.a Average annual growth rates of paid employment by household group and by type of employed person, 1988-1990 (in \%)
13.b Average annual growth rates of self-employment by household group and by type of employed person, 1988-1990 (in \%)
13.c Average annual growth rates of total employment by household group and by type of employed person, 1988-1990 (in \%)
14 Number of households and number of (equivalent) persons by household group, 1988 and 1990 Income and outlay by household group, 1990 (in million guilders) Income and outlay per equivalent person by household group, 1990 (in guilders)
17 Components of income and outlay as percentage of total resources/ uses by household group, 1990 (in of total resources/uses)
18 Average annual growth rates of income and outlay per equivalent person by household group, 1988-1990 (in 8)
Product groups as percentage of total final consumption expenditure by household group, 1990 (in 8)
Product groups as percentage of total final consumption expenditure by household group, 1990 (in $\%$ )

*) Note: The employment per household figure for self-employed households engaged in trade, hotels, restaurants, cafes and repair services seems less plausible. As already stated in the text, less plausible results by household group have not yet led to an adjustment of macro-figures. In the next revision of the national accounts such a feed-back will in fact be applied.
