- Start screen CBS StatLine
- Statistical information stored in tables

The screenshot shows the CBS StatLine website interface. At the top left is the CBS logo. To its right is a green speech bubble containing the text "Back to start screen". The top navigation bar includes the text "CBS StatLine" and a magnifying glass icon. Below this bar are three tabs: "In the spotlight" (highlighted in purple), "Tables by theme", and a search bar with the placeholder text "keyword...". The "Tables by theme" tab is active, displaying a list of themes. A green speech bubble labeled "theme" points to the "Construction and housing" theme. Under this theme, several tables are listed, including "Changes in the dwelling stock; 1995-2010", "Rent increase dwellings; type of rental", "Rent increase dwellings; region", and "Trade and industry; employment and finance per sector, SIC 2008". A green speech bubble labeled "table" points to the last of these. The list continues with "Construction industry", "Prices", "Education", "Enterprises", "Financial and business services", "Government and politics", "Health and welfare", "Income and spending" (highlighted), "International trade", and "Labour and social security". Each theme and table entry has a right-pointing arrow icon.
